**Artificial Darkness** Noam M. Elcott, 2016-05-30 This ambitious study explores how important darkness artificial darkness was as an actual technology in producing not just photographs but visual novelties and experiments in cinema in the nineteenth century The study plays out against a backdrop of urban history where most scholars have focused on the growth of artificial light and the electrification of cities Elcott's study challenges that approach In considering zones of darkness it ranges from the sites of production darkrooms studios to those of reception theaters cinemas arcades that shaped modern media and perceptions He argues that in the nineteenth century the avant garde was often less interested in the filmed image than in everything surrounding it the screen the projected light the darkness the experience of disembodiment He argues that darkness has a history separate from night evil or the color black and has a specifically modern manifestation as a media technology We are all aware of the velvet light trap in photography but at the heart of this book are technologies of darkness crucial to cinema that were commonly known as the black screen but have over time faded from the storied discourse

The Buddha and Religious Diversity J. Abraham Velez de Cea,2013-01-03 Providing a rigorous analysis of Buddhist ways of understanding religious diversity this book develops a new foundation for cross cultural understanding of religious diversity in our time Examining the complexity and uniqueness of Buddha s approach to religious pluralism using four main categories namely exclusivism inclusivism pluralistic inclusivism and pluralism the book proposes a cross cultural and interreligious interpretation of each category thus avoiding the accusation of intellectual colonialism The key argument is that unlike the Buddha most Buddhist traditions today including Therav da Buddhism and even the Dalai Lama consider liberation and the highest stages of spiritual development exclusive to Buddhism The book suggests that the Buddha rejects many doctrines and practices found in other traditions and that for him there are nonnegotiable ethical and doctrinal standards that correspond to the Dharma This argument is controversial and likely to ignite a debate among Buddhists from different traditions especially between conservative and progressive Buddhists The book fruitfully contributes to the literature on inter religious dialogue and is of use to students and scholars of Asian Studies World Religion and Eastern Philosophy
