

Two Point Perspective

Two point perspective uses two points instead of one. With your boxes you are seeing the corner first so draw 3 lines above, below and on the Horizon line

Step 1

Take the top and bottom of your line to your vanishing points. Giving you long "V"s

Step 2

Choose the thickness of your sides and draw them as straight lines

Step 3

Now take side lines top and bottom to the Vanishing points

When the lines created by taking them to the Vanishing Point you will get two "X"s that define the back side

Step 4
