*When Tumor Is the Rumor and Cancer Is the Answer* Kevin P. Ryan, 2013-03-14. The odds are more than forty percent that cancer will touch your life. Including families, cancer affects almost four million people per year. There are few common medical realities surrounded by as much malefaction, mystique, and misunderstanding as cancer. In *When Tumor Is the Rumor and Cancer Is the Answer*, author Dr. Kevin P. Ryan helps you see past the macabre mythology, stressing patient autonomy and the need to build an oncology team. Dr. Ryan addresses the need for knowledge when receiving the overwhelming news that you may or do have cancer. He covers not just the fear of the diagnosis and certain aspects of the journey of care but also discusses the entire trek from when the tumor is suspected and cancer is diagnosed. He talks about ethics of cancer care, challenges of managed care, psychosocial issues, ethical and legal components, and end-of-life issues and spirituality. Dr. Ryan also touches on difficult concepts such as physician-assisted suicide, durable power of attorney, living wills, failure to diagnose, treatments, and staging, lost opportunities in life, euthanasia, and how death by secondary intent has led to cancer cases being second in frequency of lawsuits. A common sense, straight talking guide, *When Tumor Is the Rumor and Cancer Is the Answer* provides answers to many questions in order to reduce anxiety and help those confronted with this disease to marshal their internal resources, conquer their natural fears, and ultimately learn to become cancer survivors.

**How Cancer Crossed the Color Line** Keith Wailoo, 2010-12-01 In the course of the 20th century cancer went

from being perceived as a white woman's nemesis to a democratic disease to a fearsome threat in communities of color Drawing on film and fiction on medical and epidemiological evidence and on patients' accounts Keith Wailoo tracks this transformation in cancer awareness revealing how not only awareness but cancer prevention treatment and survival have all been refracted through the lens of race Spanning more than a century the book offers a sweeping account of the forces that simultaneously defined cancer as an intensely individualized and personal experience linked to whiteness often categorizing people across the color line as racial types lacking similar personal dimensions Wailoo describes how theories of risk evolved with changes in women's roles with African American and new immigrant migration trends with the growth of federal cancer surveillance and with diagnostic advances racial protest and contemporary health activism The book examines such powerful and transformative social developments as the mass black migration from rural south to urban north in the 1920s and 1930s the World War II experience at home and on the war front and the quest for civil rights and equality in health in the 1950s and 60s It also explores recent controversies that illuminate the diversity of cancer challenges in America such as the high cancer rates among privileged women in Marin County California the heavy toll of prostate cancer among black men and the questions about why Vietnamese American women's cervical cancer rates are so high A pioneering study *How Cancer Crossed the Color Line* gracefully documents how race and gender became central motifs in the birth of cancer awareness how patterns and perceptions changed over time and how the war on cancer continues to be waged along the color line
