Cancer In Two Voices:

Cancer in Two Voices Sandra Butler, Barbara Rosenblum, 1991 **Rethinking Women's Collaborative Writing** Lorraine Mary York, 2002-01-01 York explores collaborative writing from women in Britain the United States Italy and France illuminating the tensions in the collaborative process that grow out of important cultural racial and sexual differences between the authors **Untold Stories** Nancy Hansen, Roy Hanes, Diane Driedger, 2018-04-18 This long awaited reader explores the history of Canadian people with disabilities from Confederation to current day This edited collection focuses on Canadians with mental physical and cognitive disabilities and discusses their lives work and influence on public policy Organized by time period the 23 chapters in this collection are authored by a diverse group of scholars who discuss the untold histories of Canadians with disabilities Canadians who influenced science and technology law education healthcare and social justice Selected chapters discuss disabilities among Indigenous women the importance of community inclusion the ubiquity of stairs in the Montreal metro and the ethics of disability research This volume is a terrific resource for students and anyone interested in disability studies history sociology social work geography and education **Untold Stories A Canadian Disability History Reader** offers an exceptional presentation of influential people with various disabilities who brought about social change and helped to make Canada more accessible **Treatments** Lisa Diedrich, Creative expression inspired by disease has been criticized as a celebration of victimhood unmediated personal experience or just simply bad art Despite debate however memoirs written about illness particularly AIDS or cancer have proliferated since the late twentieth century and occupy a highly influential place on the cultural landscape today In **Treatments** Lisa Diedrich considers illness narratives demonstrating that these texts not only recount and interpret symptoms but also describe illness as an event that reflects wider cultural contexts including race gender class and sexuality Diedrich begins this theoretically rigorous analysis by offering examples of midcentury memoirs of tuberculosis She then looks at Susan Sontag's *Illness As Metaphor* Audre Lorde's *The Cancer Journals* and Eve Kosofsky Sedgwick's *White Glasses* showing how these breast cancer survivors draw on feminist health practices of the 1970s and also anticipate the figure that would appear in the wake of the AIDS crisis in the 1980s the politicized patient She further reveals how narratives written by doctors Abraham Verghese and Rafael Campo about treating people with AIDS can disrupt the doctor patient hierarchy and she explores practices of witnessing that emerge in writing by Paul Monette and John Bayley Through these records of intensely personal yet universal experience Diedrich demonstrates how language both captures and fails to capture these scenes of loss and how illness narratives affect the literary medical and cultural contexts from which they arise Finally by examining the ways in which the sick speak and are spoken for she argues for an ethics of failure the revaluation of loss as creating new possibilities for how we live and die Lisa Diedrich is assistant professor of women's studies at Stony Brook University **Reconstructing Illness** Anne Hunsaker Hawkins, 1999 Serious illness and mortality those most universal unavoidable and frightening of human experiences are the

focus of this pioneering study which has been hailed as a telling and provocative commentary on our times As modern medicine has become more scientific and dispassionate a new literary genre has emerged pathography the personal narrative concerning illness treatment and sometimes death Hawkins s sensitive reading of numerous pathographies highlights the assumptions attitudes and myths that people bring to the medical encounter One factor emerges again and again in these case studies the tendency in contemporary medical practice to focus primarily not on the needs of the individual who is sick but on the condition that we call disease Pathography allows the individual person a voice one that asserts the importance of the experiential side of illness and thus restores the feeling thinking experiencing human being to the center of the medical enterprise Recommended for medical practitioners the clergy caregivers students of popular culture and the general reader Reconstructing Illness demonstrates that only when we hear both the doctor s and the patient s voice will we have a medicine that is truly human

Who's Afraid of Women's Studies? Mary Frances Rogers,C. D. Garrett,2002 In Who s Afraid of Women s Studies the authors ask why there persists a fear of feminism and women s studies in the academy Rogers and Garrett remind us that this field came into being as the result of women s practical efforts of advocacy and activism to represent marginalized excluded and silenced voices They explain the complex relationship between feminism women s studies and their deradicalized offspring gender studies Six broad topics that have dominated the field over the past twenty five years are examined in individual chapters girls and women s bodies anger and desires sexuality identity politics insider backlash and feminist methods The authors challenge women and men alike to reevaluate the concepts and analytical tools available in women s studies that are so uniquely oriented to understanding women s everyday lived experiences They demonstrate how its rich historical and social analyses are the basis for a passionate scholarship one that builds bridges between theory and practice to transform communities women s organizations and social movements This new book will be a stimulating overview of women s studies gender studies and feminist theory as well as a concise introduction to supplement standard texts or anthologies

Autoethnography for Librarians and Information Scientists Ina Fourie,2021-06-24 Autoethnography for Librarians and Information Scientists illustrates that autoethnography is a rich qualitative research method that can enhance understanding of one s own work experiences whilst also facilitating the design of tailored experiences for a variety of audiences Starting with the position that librarians and information scientists require deep insight into people s experiences needs and information behaviour in order to design appropriate services and information interventions this book shows that using only conventional methods such as questionnaires and focus groups is insufficient Arguing that autoethnography can provide unique insights into users cultural experiences and needs contributors to this volume introduce the reader to different types of autoethnography Highlighting common challenges and clarifying how autoethnography can be combined with other research methods this book will empower librarians and information scientists to conceptualise topics for autoethnographic research whilst also ensuring that they adhere to strict ethical guidelines
