Campus In Crisis:

Campus Crisis James D. Hardy, Jr., Ann Martin, 2017-07-14 Universities have stood for 900 years in Western culture with most of their institutional structures essentially unchanged They still serve three basic functions educating the faculty teaching students and gathering knowledge Funding is and always has been the main difficulty within universities and most of the problems critics point to can be traced to a lack of it universities it seems are always in crisis The authors demonstrate that universities are in fact doing well They generate an immense amount of research and drive the development of new technologies On the whole faculty members teach pretty well and students are in fact learning at least something and the challenges of inadequate funding are faced with adequate success **The Campus Crisis Toolkit** Lisa M. Di Bartolomeo, Kevin M. Gannon, 2026-03-01 The first book to address campus crises that s by and for faculty staff and students the true heart of higher ed and the people who make it work Higher education is in crisis and there s no shortage of books by campus leaders about how to fix it This volume is by and for the rest of us the faculty staff and students who comprise the lion s share of campus populations It is our values livelihoods and prospects for success that are most threatened by these crises and often by top level administrators responses to them The volume brings together more than forty contributors from colleges and universities across the United States and beyond Essays address a range of aspects of the current polycrisis including declarations of financial exigency program closures and faculty layoffs campus closures political interference and outbreaks of violence Authors draw on their own experiences and those of their colleagues and students to share what worked what didn t and what they learned along the way If crisis hasn t come to your campus yet don t worry it will When it does this book will help **Campus in Crisis** Buell Gordon Gallagher, 1974 *Overwhelmed* Sarah Brown, 2020 The prevalence of anxiety and depression is on the rise across the country particularly among young people College students of all ages are more distressed than ever before and increasing shares are enrolling with mental health histories in terms of diagnoses treatment and medication But that is not the real campus mental health crisis The crisis is that the traditional model of providing services is broken More and more overwhelmed students are seeking help overwhelming their colleges Even with growing staffs counselling centers cannot keep up Meanwhile troubled students are left with unmet needs This Chronical report explores how to handle the surging demand for mental health services fulfill legal obligations and make well being a campus wide priority The work of identifying problems and offering help can t fall solely to the counseling center The report shows how centers can expedite the intake process while expanding and clarifying options like teletherapy And it examines how new facilities and resources like meditation rooms workshops apps and courses can help students deal with underlying issues from loneliness to trauma and to build resilience Not all moves are costly And providing that support creates the kind of environment where a diverse population of students can succeed academically and otherwise Crisis on Campus Mark C. Taylor, 2010 A provocative report on the state of American higher education discusses the consequences of

decades of neglect and covers such recommendations as discontinuing tenure refocusing on education over research and tapping new technologies

The Campus and a Nation in Crisis Willis Rudy,1996 This book demonstrates how colleges and universities have played a vital role during times of great crisis in American history responding actively and helpfully to all the major challenges confronting their country The colleges of the land became politicized repeatedly by such momentous developments as the American Revolution the Civil War between the North and the South the two vast global conflicts of the twentieth century and America s controversial involvement in Southeast Asia Campus life became intensely fractious during these difficult and turbulent periods Violence sometimes accompanied the campus activism While there were significant differences in the response of groups on the campuses students and professors reacted differently for example to the crises of earlier times as compared to those in more recent years there is an element of continuity That thread of continuity from the Revolutionary era to Vietnam was the fact that time after time the members of the academic communities sought to resolve the nation s crises constructively They rallied to the cause of colonial rights and ultimately political independence They supported the aims of their embattled sections North and South They sought to influence their nation s responses to the global crises of the twentieth century And they campaigned to extricate the nation from an increasingly costly military entanglement in Southeast Asia In all five of these tests of national purpose the colleges and universities while not the ultimate decision makers helped shape the eventual patterns of America s response in an important way
