McDaniel, 1986 On the Job Craig Heron, Robert H. Storey, 1986 Every day millions of Canadians go out to work They labour in factories offices restaurants and retail stores on ships and deep in mines And every day millions of other Canadians mostly women begin work in their homes performing the many tasks that ensure the well being of their families and ultimately the reproduction of the paid labour force Yet for all its undoubted importance there has been remarkably little systematic research into the past and present dynamics of the world of work in Canada The Safety of Elderly Drivers J. Peter Rothe, 2020-03-12 By the turn of the century the elderly will comprise about 20 percent of the population in North America and 28 percent of those who drive Place this percentage in high powered automobiles and the need for planning and policy development becomes evident Most standard research on elderly drivers has not gone beyond gathering data on specific situations or characteristics This book rises beyond simple statistical presentation It blends sociological insight with statistical detail to produce an absorbing description of the elderly drivers daily lives driving styles experiences with accident and injury social relationships and life aspirations It also describes areas of neglect imagined and real health problems driving exposure and traffic violations accidents and loss of self esteem It presents In depth accounts of the trauma of loss of license and the Importance of the automobile for sustaining mental physical and social well being The self Imposed or self defined rules elderly drivers use to navigate traffic or compensate for physical frailties are described in depth The Safety of Elderly Drivers Includes penetrating comments from elderly drivers who have been involved in serious

accidents and from random elderly drivers speaking for their generation of drivers Integrating statistical findings based on Motor Vehicle Department accident data and survey data with comprehensive interviews and discussions with elderly drivers the book provides an empirically grounded In depth view of the elderly driver today Rothe summarizes theories and models of aging along with past research on elderly drivers projecting what the future may hold If present trends in medicine housing politics migration and mass transit continue It closes with a series of recommendations for future traffic planning This book will be of Interest to policymakers concerned with traffic safety as well as social scientists and others Interested In gerontological issues
