## **Church In Medieval Ireland:**

Churches in Early Medieval Ireland Tomás Ó Carragáin, 2010 This is the first book devoted to churches in Ireland dating from the arrival of Christianity in the fifth century to the early stages of the Romanesque around 1100 including those built to house treasures of the golden age of Irish art such as the Book of Kells and the Ardagh chalice Carragáin's comprehensive survey of the surviving examples forms the basis for a far reaching analysis of why these buildings looked as they did and what they meant in the context of early Irish society Carragáin also identifies a clear political and ideological context for the first Romanesque churches in Ireland and shows that to a considerable extent the Irish Romanesque represents the perpetuation of a long established architectural tradition

impressive survey covers the early history of Ireland from the coming of Christianity to the Norman settlement. Within a broad political framework it explores the nature of Irish society, the spiritual and secular roles of the Church, and the extraordinary flowering of Irish culture in the period. Other major themes are Ireland's relations with Britain and continental Europe, the beginnings of Irish feudalism, and the impact of the Viking and Norman invaders. The expanded second edition has been fully updated to take into account the most recent research in the history of Ireland in the early middle ages, including Ireland's relations with the Later Roman Empire, advances and discoveries in archaeology, and Church Reform in the 11th and 12th centuries. A new opening chapter on early Irish primary sources introduces students to the key written sources that inform our picture of early medieval Ireland, including annals, genealogies, and laws. The social, political, religious, legal, and institutional background provides the context against which *Díbh Críon* describes Ireland's transformation from a tribal society to a feudal state. It is essential reading for student and specialist alike.

**Churches in the Irish Landscape** Tomás Ó Carragáin, 2021-02-05. Between the fifth century and the ninth, several thousand churches were founded in Ireland, a higher density than in most other regions of Europe. This period saw fundamental changes in settlement patterns, agriculture, social organisation, and beliefs, and churches are an important part of that story. The premise of this book is that landscape archaeology is one of the most fruitful ways to study them. By considering their placement in relation to pagan ritual sites, royal sites, burial grounds, and settlements, we can begin to discern the shifting strategies of kings, ecclesiastics, and ordinary people. The result is a new perspective on the process of conversion and consolidation, complementary to those provided by historians.

Ó Clabaigh, Salvador Ryan, 2006. The religious art of early Christian Ireland has attracted much scholarly and popular attention. In contrast, the devotional world of later medieval Ireland has until recently been relatively neglected. This multi-disciplinary volume redresses this by examining the material culture of late medieval Irish devotion against its artistic, historical, theological, and liturgical background. The contributors draw on recent advances in international scholarship to provide a broader context for the Irish material. Subjects examined include wall paintings, metalwork, shrines, and reliquaries, manuscripts, and books of hours, stained glass, and vestments. Other contributions deal with the religious imagery of Irish bardic poetry and the cults of the Virgin Mary and St Francis of Assisi.
