Custom Published Technology And Society:

Textbooks in American Society Philip G. Altbach, Gail P. Kelly, Hugh G. Petrie, Lois Weis, 1991-09-27 In recent years textbooks have been widely criticized for low standards lack of imaginativeness and insensitivity to racial and gender issues Increasingly they are cited as another weak link in American public education This book goes beyond the headlines to examine how textbooks are produced how they are selected and what pressures are placed on textbook authors and publishers The book focuses on the relationship of the textbook to the educational system and includes important issues such as the politics of textbook policy the determinants of textbook content the role of textbooks in educational reform and the process of selection at the state level The authors offer current research on textbook policy including perspectives from those directly involved with textbooks from several thoughtful analyses by textbook editors and publishers to the views of California's Superintendent of Public Instruction

Society, Ethics, and Technology Morton Emanuel Winston, Ralph Edelbach, 1998-08 The selections for this reader come from a variety of published sources and offer diverse perspectives on technology including historical social and philosophical examinations of the topic as well as examinations of contemporary fields of technology such as automation and work computer information and technology biotechnology and population and environment This book is meant to be used in conjunction with the Infotrac on line electronic library and a four month subscription to the service is bundled with the purchase An index would have proved useful for readers c Book News Inc
