Customized Microbiology 6 , *Green Microbiology* Adenike A. Akinsemolu, Helen N. Onyeaka, 2025-08-01 *Green Microbiology Sustainability Climate Change Food and Water* provides a comprehensive overview of the principles and applications of green microbiology. The book introduces readers to various ways in which microbes can be used in sustainable development including in areas such as climate change food production bioenergy bioremediation and water treatment. The book also discusses the social economic and environmental impact of green microbiology as well as the business and future trends in this field. Edited by two experienced professionals in the field of industrial microbiology and environmental science with a particular expertise in the intersection between food processing and food microbiology this book is a valuable resource for students researchers and professionals in the field helping to solve the problems of a lack of comprehensive resources and a lack of understanding of the role of microbes in sustainable development. Covers advances in microbial green technologies and sustainable development. Discusses issues such as climate change food security and water treatment. Details how green microbiology can contribute to the achievement of the UN 2030 Sustainable Development Goals (SDGs). Provides a summary of key concepts case studies and principles of green microbiology. **Industrial Microbiology and**

Biotechnology Pradeep Verma, 2024-11-19 This book is a comprehensive guide for industrial bioprocess development covering major aspects of microbial processes and their role in biotechnology. It provides a selection of hyperproducers microbial products and metabolic engineering strategies for industrial production. It covers high cell density cultivation techniques product formation kinetics measurement and limiting parameters in large scale process development. The first and second section of the book focuses on biotechniques including spectroscopic concepts of light wave and electromagnetic theory as well as absorption fluorescence phosphorescence infrared and Raman spectroscopy. It also covers the basic principles concepts biological applications and other advanced techniques. The third section emphasizes microbial inventions and improvements in bioprocess development. It covers microbial products and recent developments in fermentation technology and also includes information on metabolic engineering. The fourth section related to microbial inventions and bioprocesses which include platforms for recombinant gene expression as well as the development of recombinant heterologous expression systems such as E coli yeast mammalian and insect cells and plant cells used as biofactories. The fifth section of the book focuses on microbial product waste management in extreme environments biomass waste management bio pulping bio bleaching textiles biofuels and animal feed production. The book aims to provide a multidisciplinary opportunity on all aspects of microbial biotechnology. It covers recent international developments that have renewed interest in industrial microbiology and biotechnology. The book is suitable for teachers researchers graduate and post graduate students environmentalists microbiologists and biotechnologists. *Microbial Genetics and Molecular Biology* Dr. Duaa Abd Alabass Muhammad, Dr. Amaar Nabeel Al Jubouri, Dr. Osamah Faisal Kokaz, Ola Raheem Gatea, 2026-03-10

Microbial Genetics and Molecular Biology explores the structure function and regulation of genetic material in microorganisms It covers DNA replication transcription translation gene expression mutations and genetic engineering techniques The book highlights modern molecular tools and their applications in medicine biotechnology and research providing a comprehensive foundation for understanding microbial systems

Using Genomics, Metagenomics and Other "Omics" to Assess Valuable Microbial Ecosystem Services and Novel Biotechnological Applications Diana Elizabeth Marco, Florence Abram, 2019-05-15 Most ecosystem services and goods human populations use and consume are provided by microbial populations and communities Indeed numerous provisioning services e g food and enzymes for industrial processes regulating services e g water quality contamination alleviation and biological processes such as plant microbial symbioses and supporting services e g nutrient cycling agricultural production and biodiversity are mediated by microbes The fast development of metagenomics and other meta omics technologies is expanding our understanding of microbial diversity ecology evolution and functioning This enhanced knowledge directly translates into the emergence of new applications in an unlimited variety of areas across all microbial ecosystem services and goods The varied topics addressed in this Research Topic include the development of innovative industrial processes the discovery of novel natural products the advancement of new agricultural methods the amelioration of negative effects of productive or natural microbiological processes as well as food security and human health and archeological conservation The articles compiled provide an updated high quality overview of current work in the field This body of research makes a valuable contribution to the understanding of microbial ecosystem services and expands the horizon for finding and developing new and more efficient biotechnological applications

Carbon Footprint and the Industrial Life Cycle Roberto Álvarez Fernández, Sergio Zubelzu, Rodrigo Martínez, 2017-05-28 This book analyzes the relationship between large scale industrial activity and the carbon footprint and provides a theoretical framework and tools to calculate the carbon footprint of industrial activities at every stage of their life cycles including urban planning master plans recycling activities project and building stages as well as managing and manufacturing Discussing the main preventative and corrective measures that can be utilized it includes case studies reports on technological developments and examples of successful policies to provide inspiration to readers This book collects the contributions of authors from four continents in order to analyze from as many as possible points of view and using many different approaches the problem of sustainability in today s globalized world
