The readings are organized to take students from a discussion on ethical frameworks and regulatory issues to a substantial treatment of the four fundamental interrelated issues of cyberethics: speech, property, privacy, and security. A chapter on professionalism rounds out the selection. Information workers find themselves rendering new services and providing new kinds of information without much recourse to universally accepted ethical standards. This work is an up to date and comprehensive overview of the subject. It promotes the view that as information managers librarians must join with other professionals to renew a commitment to and interest in ethics. The book deals with such topics as ethics in general, the control of ideas, building collections, acquisitions, and cataloging, access services, the reference function, special libraries, research and publication, and intellectual property and copyright. A chapter discusses why ethics matters.
