Green, Philip R. Muskin, 2013-03-07 Explores the psychiatric conditions that accompany many forms of headache and how to co manage the physical and mental aspects **Drug-Induced Headache** Hans-Christoph Diener, Marcia Wilkinson, 2012-12-06 M WILKINSON Patients with frequent or daily headaches pose a very difficult problem for the physician who has to treat them particularly as many patients think that there should be a medicine or medicines which give them instant relief In the search for the compound which would meet this very natural desire many drugs have been manufactured and the temptation for the physician is either to increase the dose of a drug which seems to be at any rate partially effective or to add one or more drugs to those which the patient is already taking Although there have been some references to the dangers of overdosage of drugs for migraine in the past it was not until relatively recently that it was recognized that drugs given for the relief of headache if taken injudiciously may themselves cause headache The first drugs to be implicated in this way were ergotamine and phenazone In the case of ergotamine tartrate the dangers of ergotism were well known as this was a disorder which had been known and written about for many years In the treatment of headache fully blown ergotism is rare and in recent years has usually been due to self medication in doses much greater than those prescribed although there are a few recorded cases where toxic amounts have been given *Drug Treatment of Migraine and Other Headaches* Hans-Christoph Diener, 2000 In many respects this is an outstanding book It provides an invaluable source of published evidence for the treatment of patients with headache *Drug Treatment of Migraine and Other Headaches* H. -C. headaches and pharmacologists interested in headache drugs will benefit most from this up to date critical overview
