Daily Life In Peoples China:

Daily Life for the Common People of China, 1850 to 1950 Ronald Suleski,2018-10-22 In this exciting book Ronald Suleski introduces daily life for the common people of China in the century from 1850 to 1950 They were semi literate yet they have left us written accounts of their hopes fears and values They have left us the hand written manuscripts chaoben now flooding the antiques markets in China These documents represent a new and heretofore overlooked category of historical sources Suleski gives a detailed explanation of the interaction of chaoben with the lives of the people He offers examples of why they were so important to the poor laboring masses people wanted horoscopes predicting their future information about the ghosts causing them headaches a few written words to help them trade in the rural markets and many more examples are given The book contains a special appendix giving the first complete translation into English of a chaoben describing the ghosts and goblins that bedeviled the poor working classes

China, Hong Kong, and the Long 1970s: Global Perspectives Priscilla Roberts,Odd Arne Westad,2017-08-17 This book explores the forces that impelled China the world s largest socialist state to make massive changes in its domestic and international stance during the long 1970s Fourteen distinguished scholars investigate the special perhaps crucial part that the territory of Hong Kong played in encouraging and midwifing China s relationship with the non Communist world The Long 1970s were the years when China moved dramatically and decisively toward much closer relations with the non Communist world In the late 1970s China also embarked on major economic reforms designed to win it great power status by the early twenty first centuries The volume addresses the long term implications of China s choices for the outcome of the Cold War and in steering the global international outlook toward free market capitalism Decisions made in the 1970s are key to understanding the nature and policies of the Chinese state today and the worldview of current Chinese leaders

Red China's Green Revolution Joshua Eisenman,2018-04-24 China s dismantling of the Mao era rural commune system and return to individual household farming under Deng Xiaoping has been seen as a successful turn away from a misguided social experiment and a rejection of the disastrous policies that produced widespread famine In this revisionist study Joshua Eisenman marshals previously inaccessible data to overturn this narrative showing that the commune modernized agriculture increased productivity and spurred an agricultural green revolution that laid the foundation for China s future rapid growth Red China s Green Revolution tells the story of the commune s origins evolution and downfall demonstrating its role in China s economic ascendance After 1970 the commune emerged as a hybrid institution including both collective and private elements with a high degree of local control over economic decision but almost no say over political ones It had an integrated agricultural research and extension system that promoted agricultural modernization and collectively owned local enterprises and small factories that spread rural industrialization The commune transmitted Mao s collectivist ideology and enforced collective isolation so it could overwork and underpay its households Eisenman argues that the commune was eliminated not because it was unproductive but

because it was politically undesirable it was the post Mao leadership led by Deng Xiaoping not rural residents who chose to abandon the commune in order to consolidate their control over China Based on detailed and systematic national provincial and county level data as well as interviews with agricultural experts and former commune members Red China's Green Revolution is a comprehensive historical and social scientific analysis that fundamentally challenges our understanding of recent Chinese economic history

Technological Innovation, Globalization and the Cold War Wolfgang Mueller, Peter Svik, 2022-11-24 This volume focuses on the interconnections between the Cold War technological innovation and globalization Although the consequences of globalization have received ample attention in both academia and the public discourse only limited attention has so far been given to the factors that instigated various waves of this process This holds particularly true for the period following World War II during which a struggle between the two global blocs fanned not only technological innovations but also their transfer This volume is dedicated to examining the links between the Cold War and this phase in the history of globalization a phase that gradually made the world despite high levels of international tension more and more inter related More specifically it anchors a very contemporary phenomenon to its historical context and pinpoints how the varied and multi layered East West interactions helped to induce and foster the globalization processes Emphasizing technology and its cross bloc flows as well as several levels of actors including states private companies and individuals this volume reflects an important shift towards transnationalism which has occurred in the historiography in the recent years This book will be of interest to students of Cold War Studies science and technology studies and International Relations
