Computational Intelligence, III Nick Cercone,Francesco Gardin,Giorgio Valle,1991 In recent years AI has been experiencing a deep internal debate on the appropriateness of the symbolic based paradigm and all of its consequences While various symbolic representation schemes as well as their integration have been proposed their limitations have continuously pushed researchers for improved versions or entirely new ones New viewpoints such as the complex dynamic based approach with neural nets can be regarded simply as new problem solving techniques with specific properties Under this perspective what seems to be important is the ability to combine heterogeneous representation and problem solving techniques Research on heterogeneous intelligent systems goes hand in hand with research on specific problem solving methods and paradigms therefore representing their conceptual and practical glueing element The papers contained in this proceedings are just one instance of such awareness activity in the international scientific community **Computational Intelligence in Time Series Forecasting** Ajoy K. Palit,Dobrivoje Popovic,2006-01-04 Foresight in an engineering enterprise can make the difference between success and failure and can be vital to the effective control of industrial systems Applying time series analysis in the on line milieu of most industrial plants has been problematic owing to the time and computational effort required The advent of soft computing tools offers a solution The authors harness the power of intelligent technologies individually and in combination Examples of the particular systems and processes susceptible to each technique are investigated cultivating a comprehensive exposition of the improvements on offer in quality model building and predictive control and the selection of appropriate tools from the plethora available Application oriented engineers in process control manufacturing production industry and research centres will find much to interest them in this book It is suitable for industrial training purposes as well as serving as valuable reference material for experimental researchers **Proceedings of the IEEE/IAFE 1999 Conference on Computational Intelligence for Financial Engineering (CIFEr)** International Association of Financial Engineers,1999
