Computer-assisted Analysis and Model Simplification Harvey J. Greenberg, John Stanley Maybee, 1981-01-01

COMPUTER-ASSISTED ANALYSIS AND MODEL SIMPLIFICATION : PROCEEDINGS OF THE ... SYMPOSIUM ON COMPUTER-ASSISTED ANALYSIS AND MODEL SIMPLIFICATION .., 1981 Computer-Assisted Analysis and Model Simplification Harvey J. Greenberg, John S. Maybee, 2014-05-10 Computer Assisted Analysis and Model Simplification deals with problems associated with the implementation understanding and management of large scale computer resident models This book focuses on five general research areas structural modeling qualitative economics mathematical programming systems relational databases and combinatorics In these topics this compilation discusses the scope of computer assisted analysis and model structural models and graph theory and qualitative stability of matrices and economic theory The strong sign solvability and weak satisfiability automatic identification of embedded structure in large scale optimization models and query systems for linear programming models are also deliberated This publication is a good source for students specialists and researchers interested in computer assisted analysis and model simplification **Computer-assisted Analysis and Model Simplification** Harvey J. Elzas, 2012-12-06 NATO Advanced Institute Ottawa Ontario Canada July 26 August 6 1982 **Feasibility and Infeasibility in Optimization:** John W. Chinneck, 2007-10-25 Written by a world leader in the field and aimed at researchers in applied and engineering sciences this brilliant text has as its main goal imparting an understanding of the methods so that practitioners can make immediate use of existing algorithms and software and so that researchers can extend the state of the art and find new applications It includes algorithms on seeking feasibility and analyzing infeasibility as well as describing new and surprising applications Nonparametric Comparative Statics and Stability Douglas Hale, George Lady, John Maybee, James P. Quirk, 2014-07-14 The authors leading researchers in the fields of mathematical economics and methodology present the first comprehensive synthesis of literature on qualitative and other nonparametric techniques which are important elements of comparative statics and stability analysis in economic theory The topics covered show how to assess the comparative statics and stability of economic models without a precise quantitative knowledge of all model components Applications of the analysis range from determining refutable hypotheses from theory to auditing the solutions of large computer based systems This book discusses in depth the methodology involved in a nonparametric analysis of many neoclassical economic models Constituting a virtually self contained manual on such analysis it provides detailed derivation of necessary and sufficient conditions for the existence of restrictive comparative statics and stability results for a range of specified models Further algorithms for applying certain of these conditions are given with examples as well as the underlying mathematical approach taken A large body of research is

unified covering issues that have been dealt with piecemeal in scattered but important journal articles by the authors and others The book will prove invaluable to mathematical economists mathematicians specializing in matrix or graph theory applied economists working with large scale economic models and advanced students of economics Originally published in 1999 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Advances in Sensitivity Analysis and Parametric Programming Tomas Gal,H.J. Greenberg,2012-12-06 The standard view of Operations Research Management Science OR MS dichotomizes the field into deterministic and probabilistic nondeterministic stochastic subfields This division can be seen by reading the contents page of just about any OR MS textbook The mathematical models that help to define OR MS are usually presented in terms of one subfield or the other This separation comes about somewhat artificially academic courses are conveniently subdivided with respect to prerequisites an initial overview of OR MS can be presented without requiring knowledge of probability and statistics text books are conveniently divided into two related semester courses with deterministic models coming first academics tend to specialize in one subfield or the other and practitioners also tend to be expert in a single subfield But no matter who is involved in an OR MS modeling situation deterministic or probabilistic academic or practitioner it is clear that a proper and correct treatment of any problem situation is accomplished only when the analysis cuts across this dichotomy

Recent Developments in Decision Support Systems Clyde W. Holsapple,Andrew B. Whinston,2013-06-29 Over the past two decades many advances have been made in the decision support system DSS field They range from progress in fundamental concepts to improved techniques and methods to widespread use of commercial software for DSS development Still the depth and breadth of the DSS field continues to grow fueled by the need to better support decision making in a world that is increasingly complex in terms of volume diversity and interconnectedness of the knowledge on which decisions can be based This continuing growth is facilitated by increasing computer power and decreasing per unit computing costs But it is spearheaded by the multifaceted efforts of DSS researchers The collective work of these researchers runs from the speculative to the normative to the descriptive It includes analysis of what the field needs designs of means for meeting recognized needs and implementations for study It encompasses theoretical empirical and applied orientations It is concerned with the invention of concepts frameworks models and languages for giving varied helpful perspectives It involves the discovery of principles methods and techniques for expeditious construction of successful DSSs It aims to create computer based tools that facilitate DSS development It assesses DSS efficacy by observing systems their developers and their users This growing body of research continues to be fleshed out and take shape on a strong but still
