**Computer-Generated Images** Nadia Magnenat-Thalmann, Daniel Thalmann, 2012-12-06 Research development and applications in computer graphics have dramatically expanded in recent years. Because of decreasing prices, superior hardware is now being used and image quality is better than ever. Many people now require image synthesis techniques and software for their applications. Moreover, the techniques of computer animation have become very popular. In this book, we present a wide range of applications of computer graphics. This book is a collection of 44 papers in various areas of computer graphics selected from papers presented at Graphics Interface 85. Graphics Interface 85 held from May 27 to 31 in Montreal was the first truly international computer graphics conference in Canada. This year, for the first time, the conference was presented jointly by the Computer Graphics Society and the Canadian Man-Computer Communications Society. This new arrangement gave the conference international scope. The conference was sponsored by the Department of Communications in Ottawa, the Department of Science and Technology in Quebec, Supply and Services Canada, the Natural Sciences and Engineering Research Council of Canada, Hydro-Quebec, the Association Canadienne Française pour l'Avancement des Sciences, and the Canadian Broadcasting Corporation. Graphics Interface 85 was organized by École des Hautes Études Commerciales of the University of Montreal. Over 100 papers were submitted to the conference, but 64 were selected by the international program committee for presentation. This book contains new expanded versions of the papers.

**Handbook of Financial Data and Risk Information II** Margarita S. Brose, Mark D. Flood, Dilip Krishna, Bill Nichols, 2014. Volume I examines the business and regulatory context that makes risk information so important. A vast set of quantitative techniques, internal risk measurement and governance processes, and supervisory reporting rules have grown up over time, all with important implications for modeling and managing risk information. Without an understanding of the broader forces at work, it is all too easy to get lost in the details. Back cover.

**Financial Reporting Using Computer Graphics** Irwin M. Jarett, 1987. A nontechnical guide for managers who want to use state-of-the-art computer graphics techniques to display, interpret, and utilize financial data. Step-by-step, this one-of-a-kind desk-top reference shows managers how to harness the powerful graphic capabilities of micro, mini, and mainframe computers and offers easy access to a complete working knowledge of this extraordinary new information tool. The book explains how to develop and use a graphic management information system, how computer graphics can improve the management of cash, inventory, purchasing, and accounts payable/receivable, and which kinds of graphs work best in different situations.
