John Buttelwerth

Computer Integrated Construction Project Scheduling:

Computer Integrated Construction Project Scheduling John Buttelerwerth,2005 Written in a style that is meant to be open and inviting to the reader with shorter paragraphs and interesting illustrations this book provides a single source comprehensive examination of construction project scheduling Content begins with introducing concepts of the construction industry to provide the necessary framework and background then fully discusses planning and scheduling topics in detail It offers extensively reviewed coverage on the most current version of SureTrak Software thorough coverage of manual network diagramming and CPM calculations and has built into it a capstone project The book includes an abundance of real world examples of numerous scheduling exercises including 17 pages of full size drawings and schedules that are part of the exercises Additionally the information is presented modularly in such a way that it can be customized to fit any learning situation Covers planning and scheduling including the determination of project activities logic and durations drawing precedence network diagrams and manually calculating CPM schedules creating and updating computer generated schedules and schedule reports Well suited to be used as a guide or reference by construction practitioners such as Project managers Superintendents and Construction managers

Computer Integrated Construction H. Wagter,2012-12-02 The contributions in this volume portray in terms of the current state of the art research on computer aided construction in the building industry A complete overview is given within the areas of computer aided design product modelling in construction and robot oriented design and construction together with a summary of the commercial developments in computerized systems within those areas The papers will be essential reading for all those interested in future automation in relation to the building construction industry with the accent on design and engineering

Computer Integrated Planning and Design for Construction Arkady Retik,D. A. Langford,2001 This book focuses on the intelligent application of advanced information technology tools such as CAD and KBES to design and planning in construction It describes and explains the current applications of computer tools presents new ideas for their use in design and planning processes and in particular concentrates on the preliminary design stage Computer Integrated Planning and Design for Construction aims to demonstrate the implementation of these ideas and uncover the extraordinary opportunities for design improvement as a result

Microsoft Project 2013 - Real World Scheduling John Buttelerwerth (Illustrator),2015-07-01 Microsoft Project 2013 Real World Scheduling is called real world because the author wrote it drawing upon his 30 years of experience consulting with contractors to help them meet their construction scheduling software needs He knows how contractors use scheduling software what s important to them and what is not This manual has been tested and retested in both the classroom and the company training room It will guide you thru some of the quirks of MS Project 2013 as well as teach you how use the software the way contractors use it Other software manuals are often hundreds of pages long filled with dense text that wastes your time trying to cover every corner and nuance of the software ultimately leaving readers more confused

than before they started Microsoft Project 2013 Real World Scheduling assumes that the reader has no previous exposure to the software and takes the reader through the process of creating a schedule covering the same features that a contractor would include on their typical schedule This includes creating and saving the schedule covering numerous formatting options to customize the look of the schedule working with calendars including 50% and 100% weather calendars then activity coding the schedule to organize the tasks using both Custom Task Groups and Summary Tasks Different views of the schedule are explored and from there the schedule is resource loaded and cost loaded including a real world analysis of an over allocation of resources The schedule is then Baselined and updated covering all possible update scenarios that may actually occur With this manual and a few hours of your time you will be ready to effectively use MS Project 2013 on a real project

The Organization and Management of Construction David Langford, Arkady Retik, 2002-09-11 The proceedings of the CIB W65 Symposium on the Organization and Management of Construction conference are presented here and in the companion volumes as state of the art papers documenting research and innovative practice in the field of construction The volumes cover four broad themes business management project management risk management IT development and applications Each volume is organized to provide easy reference so that the practitioner can speedily extract up to date information and knowledge about the global construction industry

Managing the Construction Enterprise Volume One Covers the firm and its business environment markets and marketing human resource management strategic planning and quality management

Managing the Construction Project Volume Two focuses upon productivity procurement international projects and human issues in relation to management performance of construction organisations

Managing Risk Volume Two incorporates discussion of risk away from regulation by government and those safety risks inherent in the construction process

Managing Construction Information Volume Three published in conjunction with Construct IT Centre of Excellence incorporates material on information systems and methods application of IT to the design and construction processes and how IT theory and applications are best transmitted to students and practitioners The work represents a collation of wide ranging ideas and theory about construction and how research has contributed to the development of the industry on a global application of research to the problems of the construction industry
