educational level The False Promises of the Digital Revolution C. A. Bowers,2014 The False Promises of the Digital Revolution examines what currently goes largely unnoticed because of the many important uses of digital technologies While many people interpret digital technologies as accelerating the global rate of progress C A Bowers focuses attention on how they reinforce the deep and ecologically problematic cultural assumptions of the West the myth of progress the substitution of data for different cultural traditions of wisdom the connections between print and abstract thinking the myth of individual autonomy the conduit view of language that hides how words metaphors reproduce earlier misconceptions and a Social Darwinian justification for colonizing other cultures that is now leading to armed resistance which in turn strengthens the ties between corporations the military and the computer science industry The book also investigates how to understand the cultural non neutrality of digital technologies how print and the emphasis on data undermine awareness of the tacit information pathways between cultural and natural ecologies and how to identify educational reforms that will contribute to a more informed public about the uses of digital technologies Schoolworlds/microworlds John Olson,1988-01-01 This book aims to clarify what the computer revolution means for schools Questions asked include how will computers affect schools What might be the positive influence The negative What might teachers and students gain from their experience with computers To discuss these questions case studies are given showing how teachers have used computers in the classroom The book is also about the potential for dialogue through which innovative ideas and existing practices transcend tradition The book also considers the potential of microcomputers and how teachers and computer innovators can achieve these potentials **Resources in Education** ,1991-07 The Frontier of Education Reform and Development in China Honggen Li,2024-07-20 This book is a collection of academic articles selected from papers published in the Chinese journal Educational Research in 2021 2022 Educational Research was first published in 1979 and is a national comprehensive and theoretical journal of education research It is sponsored by the Ministry of Education of the People s Republic of China and the China National Academy of Educational Sciences CNAES This book presents 20 important educational research articles and covers topics such as educational policies education technologies teacher education and moral education This book showcases a curated selection of education research outcomes in China and aids readers in developing a comprehensive understanding of China s education reform and development **InfoWorld** ,1991-02-25 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects **The Learning Revolution** Diana Oblinger,Sean C. Rush,1997 This is an enlightening survey of change in the teaching learning process of higher education Chapters contributed by prominent educational leaders examine how various colleges and universities are responding to today s pressing challenges particularly those concerning productivity quality access and competitiveness Technology s role in educational change is a central theme as contributors share information on its uses possibilities and benefits **Rethinking Education in the Age of Technology** Allan Collins,Richard

Halverson,2018-04-13 How can schools make the most of both the technology and the learning potential of today s born digital students Allan Collins and Richard Halverson argue that new technologies have transformed our workplaces our lives and our culture and it is time that we take the next step to transform learning in and out of schools This book explains why and how today s educators policymakers and communities must adapt to provide all learners with access to the new learning tools of the 21st century From publisher s description

Computing and Educational Studies Eugene F. Provenzo, Jr.,2014-05-01 This special issue calls for a greater awareness of computing as a critical area of study for those interested in educational studies Its purpose is to open up a wider dialogue about computing and education than has previously existed in the field The questions raised provide the basis for a lively discussion and analysis of the role of educational studies in interpreting the role of computing in our culture and educational system This issue also provides a model for exploring other topics of similar significance and importance to the field in future issues of the journal *The Computer in Education* Derick Unwin, Frank Atkinson, 1968

Five Technologies for Educational Change David F. Salisbury, 1996 *Proceedings Educational Computing Organization of Ontario*, 1985 The 88 papers included in this publication are organized into seven groupings used as themes in the conference Computing Knows No Borders The topics are Administration 12 papers Computer Studies 13 papers Educational Tools 10 papers Logo 7 papers Software 9 papers Special Education 8 papers and Teaching 16 papers An eighth group under the heading Other includes 13 papers which cut across several of the other themes and therefore deserved more general recognition An author index is provided JB

Oversold and Underused Larry CUBAN, 2009-06-30 Impelled by a demand for increasing American strength in the new global economy many educators public officials business leaders and parents argue that school computers and Internet access will improve academic learning and prepare students for an information based workplace But just how valid is this argument In *Oversold and Underused* one of the most respected voices in American education argues that when teachers are not given a say in how the technology might reshape schools computers are merely souped up typewriters and classrooms continue to run much as they did a generation ago In his studies of early childhood high school and university classrooms in Silicon Valley Larry Cuban found that students and teachers use the new technologies far less in the classroom than they do at home and that teachers who use computers for instruction do so infrequently and unimaginatively Cuban points out that historical and organizational economic contexts influence how teachers use technical innovations Computers can be useful when teachers sufficiently understand the technology themselves believe it will enhance learning and have the power to shape their own curricula But these conditions can t be met without a broader and deeper commitment to public education beyond preparing workers More attention Cuban says needs to be paid to the civic and social goals of schooling goals that make the question of how many computers are in classrooms trivial
