Forthcoming Networks and Sustainability in the IoT Era Fadi Al-Turjman, Jawad Rasheed, 2022-03-31 This book aims to provide a platform to the researchers and practitioners from both academia and industry to meet and share their experience and knowledge *Forthcoming Networks and Sustainability in the IoT Era* FoNeS IoT Volume 1 2 aims to bring together researchers and professionals to exchange ideas on the advancements in technology application areas for advanced communication systems and development of new services and facilitate a tremendous growth of new devices and smart things that need to be connected to the Internet through a variety of wireless technologies Parallel to this new capabilities such as pervasive sensing multimedia sensing machine learning deep learning unmanned aerial vehicles cloud and edge computing energy efficiency harvesting and computing power open the way to new domains services and business models beyond the traditional mobile Internet The new areas in turn come with various requirements in terms of reliability quality of service and energy efficiency These are only some examples of the challenges that are of interest to researchers in *Forthcoming Networks and Sustainability in the IoT Era* FoNeS IoT It will explore the latest developments innovations and best practices within the IoT and the impact it has on industries including manufacturing transport supply chain communication government legal sectors financial services energy utilities insurance health care retail and many others It provides opportunities for academicians and scientists along with professionals policymakers and practitioners from various fields in a global realm to present their research contributions and views on one forum and interact with members inside and outside their own particular disciplines Papers describing applications of IoT in e Health Smart Systems Management Communication and Education are also included but the focus is mainly on how new and novel techniques advance the performance in application areas rather than a presentation of yet another application of conventional tool Papers on such applications describe a principled solution emphasize its novelty and present an in depth evaluation of the techniques being exploited *Spatial Synthesis in Computer-aided Building Design* Charles M. Eastman, 1975 *When the Machine Made Art* Grant D. Taylor, 2014-04-10 Considering how culturally indispensable digital technology is today it is ironic that computer generated art was attacked when it burst onto the scene in the early 1960s In fact no other twentieth century art form has elicited such a negative and hostile response *When the Machine Made Art* examines the cultural and critical response to computer art or what we refer to today as digital art Tracing the heated debates between art and science the societal anxiety over nascent computer technology and the myths and philosophies surrounding digital computation Taylor is able to identify the destabilizing forces that shape and eventually fragment the computer art movement *Creativity and Art* Margaret A. Boden, 2012-10-25 Margaret Boden presents a series of essays in which she explores the nature of creativity in a wide range

of art forms Creativity in general is the generation of novel surprising and valuable ideas conceptual theoretical musical literary or visual Boden identifies three forms of creativity combinational exploratory and transformational These elicit differing forms of surprise and are defined by the different kinds of psychological process that generate the new ideas Boden examines creativity not only in traditional fine art but also in craftworks and some less orthodox approaches namely conceptual art and several types of computer art Her Introduction draws out the conceptual links between the various case studies showing how they express a coherent view of creativity in art
