Jäger, 2012-12-06 This volume summarizes the state of the art in supercomputing with special emphasis on the industrial relevance of the presented results and methods The book showcases an innovative usage of state of the art modeling novel numerical algorithms and the use of leading edge high performance computing systems in a GRID like environment

Proceedings of the 1995 International Conference on Parallel Processing Constantine Polychronopoulos, 1995-08-08 This set of technical books contains all the information presented at the 1995 International Conference on Parallel Processing This conference held August 14 18 featured over 100 lectures from more than 300 contributors and included three panel sessions and three keynote addresses The international authorship includes experts from around the globe from Texas to Tokyo from Leiden to London Compiled by faculty at the University of Illinois and sponsored by Penn State University these Proceedings are a comprehensive look at all that s new in the field of parallel processing Parle '91 Parallel Architectures and Languages Europe Emile H.L. Aarts, Jan van Leeuwen, Martin Rem, 2013-11-11 The innovative progress in the development of large and small scale parallel computing systems and their increasing availability have caused a sharp rise in interest in the scientific principles that underlie parallel computation and parallel programming The biannual Parallel Architectures and Languages Europe PARLE conferences aim at presenting current research material on all aspects of the theory design and application of parallel computing systems and parallel processing At the same time the goal of the PARLE conferences is to provide a forum for researchers and practitioners to exchange ideas on recent developments and trends in the field of parallel computing and parallel programming The first two conferences PARLE 87 and PARLE 89 have succeeded in meeting this goal and made PARLE a conference that is recognized worldwide in the field of parallel computation PARLE 91 again offers a wealth of high quality research material for the benefit of the scientific community Compared to its predecessors the scope of PARLE 91 has been broadened so as to cover the area of parallel algorithms and complexity in addition to the central themes of parallel architectures and languages The proceedings of the PARLE 91 conference contain the text of all contributed papers that were selected for the programme and of the invited papers by leading experts in the field **The 16th Annual International Symposium on Computer Architecture** International Symposium on Computer Architecture, 1989 **Proceedings, the 20th Annual International Symposium on Computer Architecture**, 1993 2015 ACM/IEEE 42nd Annual International Symposium on Computer

Proceedings / Annual International Symposium on Computer Architecture. 10. 1983. Stockholm, Sweden, (June 13 - 17, 1983) International Symposium on Computer Architecture, 1983 *Memory Performance of Prolog Architectures* Evan Tick, 2012-12-06 One suspects that the people who use computers for their livelihood are growing more sophisticated as the field of computer science evolves This view might be defended by the expanding use of languages such as C and Lisp in contrast to the languages such as FORTRAN and COBOL This hypothesis is false however computer languages are not like natural languages where successive generations stick with the language of their ancestors Computer programmers do not grow more sophisticated programmers simply take the time to muddle through the increasingly complex language semantics in an attempt to write useful programs Of course these programmers are sophisticated in the same sense as are hackers of MockLisp PostScript and Tex highly specialized and tedious languages It is quite frustrating how this myth of sophistication is propagated by some industries universities and government agencies When I was an undergraduate at MIT I distinctly remember the convoluted questions on exams concerning dynamic scoping in Lisp the emphasis was placed solely on a hacker's view of computation i.e. the control and manipulation of storage cells No consideration was given to the logical structure of programs Within the past five years Ada and Common Lisp have become programming language standards despite their complexity note that dynamic scoping was dropped even from Common Lisp Of course most industries selection of programming languages are primarily driven by the requirement for compatibility with previous software and performance **Computer Sciences Technical Report** ,1996 **Proceedings of the 15th International Conference on Distributed Computing Systems** IEEE Computer Society.
