Computers And Schools:

Oversold and Underused Larry CUBAN,2009-06-30 Impelled by a demand for increasing American strength in the new global economy many educators public officials business leaders and parents argue that school computers and Internet access will improve academic learning and prepare students for an information based workplace But just how valid is this argument In Oversold and Underused one of the most respected voices in American education argues that when teachers are not given a say in how the technology might reshape schools computers are merely souped up typewriters and classrooms continue to run much as they did a generation ago In his studies of early childhood high school and university classrooms in Silicon Valley Larry Cuban found that students and teachers use the new technologies far less in the classroom than they do at home and that teachers who use computers for instruction do so infrequently and unimaginatively Cuban points out that historical and organizational economic contexts influence how teachers use technical innovations Computers can be useful when teachers sufficiently understand the technology themselves believe it will enhance learning and have the power to shape their own curricula But these conditions can t be met without a broader and deeper commitment to public education beyond preparing workers More attention Cuban says needs to be paid to the civic and social goals of schooling goals that make the question of how many computers are in classrooms trivial *The Child and the Machine* Alison Armstrong,Charles Casement,2000-01-01 The United States spends 6 5 billion on educational technology 1998 99 yet children s educational performance remains stagnant The Child and the Machine shows how our rush to use computers has led to the most expensive and least helpful revolution in the history of education **Computers, Schools and Students** Cedric Cullingford,Nusrat Haq,2016-05-23 How have schools been affected by the introduction of computer technology and has it changed the school life and experience of students This book uses research from both large and small secondary schools including those specializing in technology and those with higher numbers of pupils with special needs to look at the results of all the political initiatives and investment in ICT The authors found that the ambitious expectations fell short of reality Their research into the reasons for this shortfall can help teachers understand and develop ways to make the best use of computers in their schools It is equally informative for educational researchers and policy makers **Computers in Schools** Steve Greenwood,1993 *Computers in the Classroom* Andrea R. Gooden,1996-10-07 Since 1979 Apple Computer s Educational Grants program has provided computer equipment and training to schools through a nationwide competitive process Computers in the Classroom tells the inspiring stories of some of these schools showing how technology has revived the classroom This illustrated book is an indispensable resource for teachers and parents showing examples of students work and with information on funding resources technical support software and where to find electric and print data 100 illus *The Technology Fix* William D. Pflaum,2004-02-15 During the technology boom of the 1980s and 1990s computers seemed set to revolutionize education Do any of these promises sound familiar Technology would help all students learn better thanks to

multimedia programs capable of adapting to individual needs learning styles and skill levels Technology would transform the teacher s role from a purveyor of a one size fits all curriculum to a facilitator of student exploration Technology would replace static textbooks with dynamic interactive learning resources that were always up to date Technology would boost test scores as engaged and motivated students acquired advanced skills problem solving abilities and a growing thirst for knowledge By 2001 educational materials developer William D Pflaum had begun to suspect that technology was not the all purpose solution it had seemed He decided to see how computers were really being used in U S classrooms and embarked on a yearlong road trip to a cross section of elementary middle and high schools throughout the nation In this book he recounts his journey Although he did find technology application to admire too often he found broken promises millions spent for little measurable gain problems instead of solutions a fix instead of a fix This inside look at computer use in our schools shares the voices experiences triumphs and frustrations of educators and students in urban rural and suburban settings The author provides insight into the key roles that computers currently play in the classroom and clarifies what we must do ensure that the promise of technology is fulfilled and that students truly benefit Note This product listing is for the reflowable ePub version of the book   Reflections on the History of Computers in Education Arthur Tatnall,Bill Davey,2014-05-05 This book is a collection of refereed invited papers on the history of computing in education from the 1970s to the mid 1990s presenting a social history of the introduction and early use of computers in schools The 30 papers deal with the introduction of computer in schools in many countries around the world Norway South Africa UK Canada Australia USA Finland Chile The Netherlands New Zealand Spain Ireland Israel and Poland The authors are not professional historians but rather people who as teachers students or researchers were involved in this history and they narrate their experiences from a personal perspective offering fascinating stories   **Children and Computers in School** Betty A. Collis,Gerald A. Knezek,Kwok-Wing Lai,Keiko T. Miyashita,Willem J. Pelgrum,2013-11-26 This volume integrates research findings from three multinational studies conducted to examine the impact of children s use of computers in school Conclusions are drawn from in depth analyses of trends in more than 20 nations Its seven authors from four nations were key researchers on these projects Both a study and a product of the information age this work is of prime importance to teachers teacher educators and school administrators This work is unique in three important ways it presents data gathered in many regions of the world many of the authors are well known and respected for their previous work in educational studies and the chapters are designed in such a way that the majority of the book is easily accessible to professionals such as classroom teachers who are interested primarily in findings results and outcomes rather than the methodology of the research   *Educational Computing in the Schools* Jay S. Blanchard,1999 Increase literacy learning with multimedia technologies Educational Computing in the Schools Technology Communication and Literacy examines critical issues of technology teaching and learning through the areas of access communication and literacy to help students from preschool to college get the most out

of using computers for educational purposes As an educator interested in technology applications in the classroom you will discover new ideas and practices for gaining access to and correctly using technology in education such as using electronic journaling libraries and chat rooms This important book explores areas such as using the Internet to foster literacy growth in developing nations connecting schools and communities and the use of technology to enhance early literacy This important book explores examples of creating access to technology for learning at three levels state community and international You will discover new facets of online publishing to teach reading and learn how multimedia technology can accommodate various learning styles Educational Computing in the Schools gives you access to new ideas for your school or educational programs with several innovative ideas and programs including using LemonLINK which links schools and communities with the latest technologies exploring the creation of the Highlights for Children Web site and chat room which is complete with actual messages sent to the online publication by children and an overview of the online team that works to keep the sight educational and appropriate using computers to encourage and help children to play and learn requesting more multimedia equipment in classrooms based on the projected impact of the Internet the networking of schools and the increased availability of grants and funding for technology connecting technologically disadvantaged schools and countries with technologically enriched ones to benefit studentsEducational Computing in the Schools covers many of the challenges and issues that schools are facing today concerning teaching and learning with technology This important book focuses on making technology accessible and incorporating new styles of communication teaching and learning into the classroom This vital book will improve computer literacy in your school and make educational topics exciting and readily available to students **Computers in Schools** Alberta. Minister's Task Force on Computers in Schools,1983 **Computers in Third-World Schools** David Hawkridge,John Jaworski,Harry McMahon,1990-06-29 The reasons why governments of developing countries should put computer technology in their schools are highly controversial but no less than the actual use being made of these comparatively expensive machines and their software This book looks at experience in African Asian and Arabic speaking countries that already have computers in some of their schools It is based mainly on research in China Jordan Kenya Mauritius Sri Lanka and Tunisia The authors debate policy and practice in the light of experience to date They identify the rationales commonly deployed by Ministries of Education and international agencies but argue themselves for a long term view of the potential of computers to liberalise education and through such education to reduce dependency and inequity **An Apple for the Teacher** Melissa Evans-Andris,1996-06-24 Take a look at the use of computers in classrooms from the teacher s perspective Explore the best and worst ways to use computers in the classroom Evans Andris gives you models of the three basic computer use styles teachers adopt She helps you identify the ways your teachers use computers in their classrooms and shows how to support their best efforts to incorporate computers into teaching and learning Find out how you can encourage teachers to use this new tool to enhance their teaching abilities help augment their knowledge base

and boost their careers Evans Andris offers a thorough systematic examination of how teachers react and how teaching and learning change when computers come into the classroom She recommends strategies to help you Motivate your teachers to incorporate technology into their curriculum Improve students learning and performance Shift responsibilities to computer coordinators Support your teachers efforts to use computers creatively and constructively Guide your staff through the tricky changes that result from bringing in technology You ll learn how to focus teachers efforts on integrating technology into their classes manage your computer coordinator and get everyone to work toward your shared goal of making technology count Let the crucial information in this book help you lead your staff and students into the 21st century of learning   The Use of Computers in Instruction in Secondary Schools Warren J. Koch,1972   Cross National Policies and Practices on Computers in Education International Association for the Evaluation of Educational Achievement,1996-09-30 This book reports on the policies and practices regarding computers in education in 20 countries representing Northern America Asia and both the Eastern and Western parts of Europe Moreover the editors have analysed and reflected from several perspectives on the richness of the national reports resulting in chapters on curricular in equity and education paradigmatic aspects of the introduction of computers in education   **Computers in Schools** New Zealand. Consultative Committee on Computers in Schools,1982   Microcomputers in the Schools James L. Thomas,1981   **Technology in Education** Cleborne D Maddux,D Lamont Johnson,2013-12-19 Examine the history of the microcomputer and its impact on education Under the editorship of D LaMont Johnson PhD a nationally recognized leader in the field of educational computing Computers in the Schools has been a powerful tool in educational settings Now after 20 years Professor Johnson muses on how far information technology has come Technology in Education A Twenty Year Perspective brings you a retrospective look at the trends and issues relating to the integration of computers into the school curriculum covering 25 years He joins several other colleagues to follow the historical journey of the dream machine to the technological wonder it has become Technology in Education A Twenty Year Perspective will leave you better informed on such topics as the obstacles slowing the integration of information technology in education why are computers still collecting dust in many classrooms the predictions that were made by early computer enthusiasts and how close or off the mark those predictions came how information technology has impacted education and society so far historical advances in education that should be celebrated such as the advent of the World Wide Web the student s perspective of computers in education and much more Computers in the Schools is the one of the oldest academic journals dealing directly with the integration of information technology into the educational setting Technology in Education A Twenty Year Perspective provides an important overview by some of the leading experts in the field From the earliest predictions and opinions to the latest trends and findings this book celebrating the journal s twentieth anniversary is a vital research tool for students and professors of information technology in education   Laptops and Literacy Mark Warschauer,2006-09-25 Examines laptop use in classrooms and how it influences literacy discussing reading and writing

challenges of the twenty first century the history of computer use in schools research on schools implementing one on one computing and other related topics **The Digital Pencil** Jing Lei,Paul F. Conway,Yong Zhao,2008 This book takes a serious historical and international look at the digital pencil movement to equip every student with a computing device with wireless connection Using an ecological perspective as an overarching framework and drawing on their own studies and available literature that illuminate the issues related to one to one computing the authors present well reasoned discussions about a set of complex and critical issue facing policy makers educators students parents and the general public The Digital Pencil addresses four key questions Is the digital pencil a good idea The authors analyze the costs and benefits of one to one computing programs through consideration of multiple indicators and examine the evaluation reports of various projects within their analytical framework to present a comprehensive summary of outcomes of one to one computing projects What happens when each child has a networked computer The authors analyze existing data with the goal of gaining insights and making suggestions and recommendations for policy makers teachers and parents What should schools purchase or lease is there an ideal device These authors examine the relative advantages and disadvantages of different devices and implementation schemes How do we know if one to one computing is making a difference The authors review the evaluation plans of the various projects and propose a framework for comprehensive evaluation and research on one to one computing This book is intended for researchers school administrators educational technology professionals and policy makers in the U S and around the world and as a supplemental text for advanced courses in education technology and technological innovation **In Search of the Most Amazing Thing** Thomas F. F. Snyder,Tom Snyder,Jane Palmer,1986
