Computers As Theatre:

Computers as Theatre Brenda Laurel, 2014 Brenda Laurel's *Computers as Theatre* revolutionized the field of human computer interaction offering ideas that inspired generations of interface and interaction designers and continue to inspire them Laurel's insight was that effective interface design like effective drama must engage the user directly in an experience involving both thought and emotion Her practical conclusion was that a user's enjoyment must be a paramount design consideration and this demands a deep awareness of dramatic theory and technique both ancient and modern Now two decades later Laurel has revised and revamped her influential work reflecting back on enormous change and personal experience and forward toward emerging technologies and ideas that will transform human computer interaction yet again Beginning with a clear analysis of classical drama theory Laurel explores new territory through the lens of dramatic structure and purpose *Computers as Theatre Second Edition* is directed to a far wider audience is written more simply and elegantly is packed with new examples and is replete with exciting and important new ideas This book Draws lessons from massively multiplayer online games and systems social networks and mobile devices with embedded sensors Integrates values driven design as a key principle Integrates key ideas about virtual reality Covers new frontiers including augmented reality distributed and participatory sensing interactive public installations and venues and design for emergence Once more Brenda Laurel will help you see the connection between humans and computers as you never have before and help you build interfaces and interactions that are pleurably joyously right

Computers as Theatre Brenda Laurel, 1993 A lucid and provocative study of the art craft business of optimal interfaces takes a highly original look at our imperfect relationships with our machines then points the way to improving things Fun and of real importance William Gibson

Computing and Educational Studies Eugene F. Provenzo, Jr.,2014-05-01 This special issue calls for a greater awareness of computing as a critical area of study for those interested in educational studies Its purpose is to open up a wider dialogue about computing and education than has previously existed in the field The questions raised provide the basis for a lively discussion and analysis of the role of educational studies in interpreting the role of computing in our culture and educational system This issue also provides a model for exploring other topics of similar significance and importance to the field in future issues of the journal
