Comprehensive Biochemistry Volume 16:

Comprehensive Biochemistry. Vol. 12-16 (section 3). Biochemical Reaction Mechanisms Marcel Florkin, Elmer H. Stotz, 1964

Selected Topics in the History of Biochemistry. Personal Recollections. V G. Semenza, R. Jaenicke, 1997-08-07 The Editors invited selected authors who had participated in or observed the explosive development of biochemistry and molecular biology particularly in the second half of this century to record their personal recollections of the times and circumstances in which they did their work The authors were given a completely free rein with respect to both content and style and the editors have made no attempt to impose any sort of uniformity in the chapters Each reflects the flavour of the personality of the author The contributors to this volume encompass a wide variety of experiences in many different countries and in very different fields of biochemistry Some have worked close to the laboratory bench throughout their scientific life and are continuing to do so Others have been closely engaged in organisational matters both nationally and internationally All mention incidents in their own career or have observed those in others that will be of interest to future historians who will record and assess the period in which our contributors lived and worked It was an extremely exciting time for life sciences

Comprehensive Biochemistry Marcel Florkin, Elmer Henry Stotz, 1962

Selected Topics in the History of Biochemistry: Personal Recollections IX, 2005-07-29 This book is the latest volume in the highly successful series *Comprehensive Biochemistry* It provides a historical and autobiographical perspective of the developments in the field through the contributions of leading individuals who reflect on their careers and their impact on biochemistry Volume 44 is essential reading for everyone from graduate student to professor placing in context major advances not only in biochemical terms but in relation to historical and social developments Readers will be delighted by the lively style and the insight into the lives and careers of leading scientists of their time

Principles of Enzymology for the Food Sciences John R. Whitaker, 2018-12-19 This second edition explains the fundamentals of

enzymology and describes the role of enzymes in food agricultural and health sciences Among other topics it provides new methods for protein determination and purification examines the novel concept of hysteresis and furnishes new information on proteases oxidases polyphenol oxidases lipoxygenases and the enzymology of biotechnology

Mechanisms of Protease Action Laszlo Polgar,1989-01-31 A uniform treatment of the four protease groups and a discussion of the differences and similarities in their action is presented in this important new publication Serine cysteine aspartate and zinc proteases are systematically discussed by nomenclature evolution specificity and their regulatory role The chemistry of the peptide bond including the catalysis of ester and peptide hydrolyses is explained For each protease group the emphasis is placed on the structure and function Kinetics enzyme modifications isotope effects subzero temperature investigations nuclear magnetic resonance measurements X ray diffraction data binding of transition state analogs zymogen activation and site specific mutagenesis are combined to rationalize the action of proteases Both natural and synthetic inhibitors are considered because of their importance in mechanistic studies and drug design

COMPREHENSIVE BIOCHEMISTRY. VOL. 16. HYDROLYTIC REACTIONS, COBAMIDE AND BIOTIN COENZYMES. M. FLORKIN,1965

Advances in Enzymology and Related Areas of Molecular Biology Alton Meister,2009-09-10 *Advances in Enzymology and Related Areas of Molecular Biology* is a seminal series in the field of biochemistry offering researchers access to authoritative reviews of the latest discoveries in all areas of enzymology and molecular biology These landmark volumes date back to 1941 providing an unrivaled view of the historical development of enzymology The series offers researchers the latest understanding of enzymes their mechanisms reactions and evolution roles in complex biological process and their application in both the laboratory and industry Each volume in the series features contributions by leading pioneers and investigators in the field from around the world All articles are carefully edited to ensure thoroughness quality and readability With its wide range of topics and long historical pedigree *Advances in Enzymology and Related Areas of Molecular Biology* can be used not only by students and researchers in molecular biology biochemistry and enzymology but also by any scientist interested in the discovery of an enzyme its properties and its applications

Organophosphorus Pesticides Morifusa Eto,2018-01-18 In order to get a general concept of organophosphorus pesticides with such a variety in structure and biological activities consideration of each aspect of chemistry biochemistry and the applied sciences is necessary This book consists of these three main parts After the presentation of the background of phosphorus chemistry in Chapter 1 stress was put on the chemical and biochemical reactions of organophosphorus pesticides including synthesis analysis metabolism mode of action and other interesting aspects in Chapter 2 to 4 and on the structure pesticidal activity relationship in Chapter 5

Atlas of Protein Sequence and Structure ,1972 *Comparative Animal Biochemistry* Klaus Urich,2013-04-17 tribute greatly to understanding the origins of The plan for this book goes back almost 20 years Already at that time it was possible to recognize organisms an extraordinary variation in metabolites and To provide the biochemist with a ready over processes

superimposed upon the basic biochem view of the structural diversity of animals the book includes a simplified version of animal sys ical system of animals Each species each indi tematics for further information on the classifica vidual in fact each type of cell of the multicellu lar organism possesses its own biochemical char tion structure and life of particular animal spe acter and this molecular variety its biological sig cies the reader should consult the relevant text nificance and its evolutionary development books It is assumed that the zoologist reader has throw up many interesting questions The com a basic knowledge of biochemistry important general biochemical facts are in any case given for parative approach that has been so productive at many of the subjects covered the higher levels of complexity of morphology and physiology can also be used to great effect at I had already completed several chapters of the molecular level this book by the beginning of the 1970s *A Discussion on the Structures and Functions of Proteolytic Enzymes* ,1970 **Biotransformations in Preparative Organic Chemistry** H.
