and derive at last but little benefit from the study By the arrangement in this treatise each section bears its own fruit and will be if learned of permanent value whether any further progress is made or not The book too can be more conveniently resumed at the beginning of any Section Parsing and Analysis have not only been made full but stripped of much super uous machinery Doctrines and classifications have in many places been simplified and abridged and for some of the insufiicient articles in our grammars have been substituted others that are altogether more substantial The book comprises both a Primary and a Higher Grammar and is in the highest Ruse progressive and philosophical It is built up in Part First by a regular synthesis from the Alphabet to Analysis in Part Second from Pronunciation to Versifica tion and closes with a thorough and well authorized section on Punctuation as teaching the finish to the whole In other grammars most of the doctrine is printed in small type and the exercises are printed in larger This may be more agreeable to the teacher but it is less so to the learner I have given the main principles first in large type and apart from the examples then the exercises in type sufficiently large and lastly the unimportant doctrine in smaller type under the head of Observations and at the end of each section The best modes of teaching and learning have been constantly kept in mind but of course no reasonable teacher or learner will imagine that the grammar of a mighty lan guage of a language that reaches into every fibre of human knowledge can be learned without labor or in six lessons 1 A full preface explanatory and defensive would require many pages I therefore leave the work without further remark to the candor judgment and research of the reader About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com
