Nuffield Mathematics Project(NMP) was launched in the year 1964 for primary school in Britain and financed by the Nuffield Foundation and support by British Education Ministry. The main aim of this project was to introduce a new approach as well as new method in teaching and learning of mathematics for primary student. This project based on Piaget learning theory which emphasized the importance of learning mathematics through concrete experience and according to the pupils level of cognitive development between the age of 6 and 12 year old. The philosophy of NMP can be explained with the following expressions

I listen, I forget ;

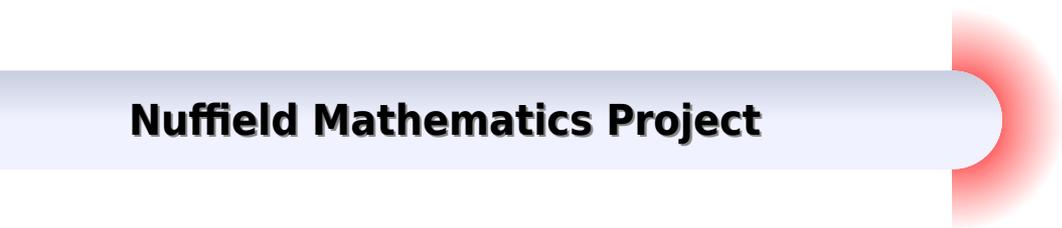

I see, I remember ;

I do, I understand ;

In NMP, the contents of this Primary School Mathematics Syllabus Was then rearranged to follow the principle such as from simple to complex , from concrete to abstract and from nearby-experiences to distance-experiences . Under Dr . Geoffrey Mathews, a team of mathematics writer was published a lot of teachers' guide books and teaching modules for teachers. Besides, Work sheets and various learning instruments also were produced for pupils to use during group activities. NMP is a project that received a good response and successfully in achieving its objectives. NMP had become important source for others countries like Malaysia. For example , Special Project launched in Malaysia in 1970, to a large extent, adopted most of the ideas from NMP.
