Reality for Industrial Applications Fan Dai,2012-12-06 Just a few years ago virtual reality was regarded as more a toy
than a tool Today however it is becoming the enabling technology for man machine communications The rapid development
of graphics hardware and soft ware makes its application possible Besides building walkthroughs and landscape fly overs
with very realistic visual effects we can recognize the trend toward industrial applications This is because of the emerging
need for tools for rapid product development Especially in the aeronautical and automotive industries companies have began
to investigate and develop virtual reality tools for their own needs in co operation with research or ganizations In co
operation with the Fraunhofer Institute for Computer Graphics IGD the Computer Graphics Center ZGDV in Darmstadt
established the German working group on virtual reality in 1993 as a forum for infor mation exchange between industry and
research German researchers system developers and industrial users have met several times in Darm stadt at the Computer
