It includes an abundance of authentic student projects and provides K-12 classroom teachers with essential information on how to use technology as an everyday tool. The Third Edition focuses on emergent technology information and strengthens its hallmark focus on cognitive learning. New coverage includes updated information on the Internet, voice recognition technology, Internet 2, and the use of digital cameras for video projects. Coverage of standards such as ISTE and AECT gives teachers basic understanding of what standards are and how they will impact teaching. Computer Applications in Instruction Northwest Regional Educational Laboratory, Judith B. Edwards, 1978. Intended for upper elementary and secondary teachers in all subject areas, this guide provides practical advice on determining the appropriate application of computer technology and on the selection of specific subject-related computer-based instruction units. Under the heading of hardware and software, topics discussed include communicating with a computer, computer size, getting and using user's programs, translators and programming languages, and the elements of a program. The computer is analyzed in terms of its uses as instructor, laboratory, calculator, object of instruction, and instructor's aide. The selection of computer-based instructional units is described from the beginning of the selection process through final decision making. Individual papers then focus on uses of the computer in the following specific areas: art education, business education, instruction for the deaf and hard of hearing, elementary school language arts, mathematics curriculum, and instruction, music education, physical education, secondary science, natural science, and the social sciences. Keys to Recognizing General Purpose Languages and some primary sources of computer-based instructional units are appended.
