[Conformation of Carbohydrates](#) V. S. R. Rao, 2019-08-22 This text will give the reader a firm understanding of all aspects of carbohydrate conformation by describing and explaining the importance of interactions between carbohydrates and interactions of carbohydrates with proteins nucleic acids or any other macromolecule The authors have gathered a wealth of information on carbohydrate structures different methods of conformational analysis the role of carbohydrates as recognition molecules in biological systems and their industrial applications Whether you are a student teacher or a basic researcher this text book is a one stop source of current information on carbohydrate conformation and the potential use of conformational properties in industry and also of their crucial role in important biological events such as cell cell interaction cell adhesion cellular signaling mechanism      *Mechanisms of Taste Transduction* Sidney A. Simon, Stephen D. Roper, 2014-07-22

*Mechanisms of Taste Transduction* introduces a number of topics essential to a complete understanding of taste These topics range from the control of food intake to the biophysical mechanisms of transduction and the design of food flavors in the food industry The responses and organization of special sensory pathways are described in regard to the      **Science and Technology of Fructans** Michio Suzuki, N. Jerry Chatterton, 1993-07-23 The first book to be published on the subject of fructans Science and Technology of Fructans provides a thorough treatment of this carbohydrate from recent research in a broad range of disciplines to applications in crop animal and food science This volume includes a detailed glossary and offers a terminology system that can be used by all fructan scientists It also reviews modern analytical methods and Japanese and European technologies for commercial production and use of fructans Topics covered by contributors to Science and Technology of Fructans include chemical structure and characteristics metabolism in microorganisms and plants fructans in crop production and preservation and in human and animal diets and production and utilization of microbial fructans and inulin A chapter by J S D Bacon and J Edelman who established the modern biochemistry of fructans in the mid 20th century includes personal reminiscences of the early years of fructan research Since this volume crosses all disciplinary boundaries of fructan research Science and Technology of Fructans is indispensable to biochemists carbohydrate chemists analytical chemists and crop horticultural animal and food scientists It will also be useful reading for nutritionists agricultural extension workers and members of the food industry      [NMR Spectroscopy and Computer Modeling of Carbohydrates](#) J. F. G. Vliegthart, 2006 Enormous progress has been made in the development of nuclear magnetic resonance MNR instruments and techniques during the past 10 years The application of NMR to carbohydrates and related compounds has opened up a several new possibilities The present day dissemination of NMR instruments renders it possible for a larger group of glyco

scientists to record and interpret their own NMR spectra A review of the potency of the techniques in this field is therefore appropriate

Molecular Glycobiology Minoru Fukuda, Ole Hindsgaul, 1994 Cell surface carbohydrates play critical roles in cell cell interactions This well written book brings together leading researchers to detail major recent advances regarding our understanding of the molecular mechanisms underlying such processes Emphasis is given to cell type specific carbohydrate expression and the carbohydrates and proteins involved in cell recognition Topics include the molecular structure of animal lectins carbohydrate recognition in cell cell interaction chemical synthesis of oligosaccharides conformational studies on oligosaccharides and cell surface carbohydrates among others Also included is a full discussion of key experimental approaches such as chemical synthesis and the three dimensional structural analysis of carbohydrates Providing both an up to date description of the subject and a forecast of likely future developments Molecular Glycobiology is a much needed synopsis of an exciting and rapidly expanding field It will be welcomed by students and researchers in molecular biology biochemistry cell biology and glycobiology

Carbohydrates Paul Finch, 1999-06-30 For students with more than a passing interest in carbohydrate chemistry scientists from Europe North America and New Zealand provide an overview of the current status in a number of particular areas perceived to be central at a level between basic texts and specialist treatments They summarize the working understanding of the structure and syntheses of monosaccharide oligosaccharide and glycopeptide units and the properties of some important examples and derivatives including sulphates and polysaccharides Among specific topics are the conjugation of monosaccharides oligosaccharide geometry and dynamics shapes and interactions of polysaccharide chains the chemistry of polysaccharide modification and degradation and interactions between carbohydrates and proteins Annotation copyrighted by Book News Inc Portland OR
