*Computer Simulations of Self-organization in Biological Systems* Narendra S. Goel, Richard L. Thompson, 1988

Artificial Life Christopher Langton, 2019-04-02 In September 1987 the first workshop on Artificial Life was held at the Los Alamos National Laboratory jointly sponsored by the Center for Nonlinear Studies the Santa Fe Institute and Apple Computer Inc the workshop brought together 160 computer scientists biologists physicists anthropologists and other assortedists all of whom shared a common interest in the simulation and synthesis of living systems During five intense days we saw a wide variety of models of living systems including mathematical models for the origin of life self reproducing automata computer programs using the mechanisms of Darwinian evolution to produce co adapted ecosystems simulations of flocking birds and schooling fish the growth and development of artificial plants and much much more The workshop itself grew out of my frustration with the fragmented nature of the literature on biological modeling and simulation For years I had prowled around libraries shifted through computer search results and haunted bookstores trying to get an overview of a field which I sensed existed but which did not seem to have any coherence or unity Instead I literally kept stumbling over interesting work almost by accident often published in obscure journals if published at all

Mikko Karttunen, Ilpo Vattulainen, Ari Lukkarinen, 2004-03-15 Soft matter and biological systems pose many challenges for theoretical experimental and computational research From the computational point of view these many body systems cover variations in relevant time and length scales over many orders of magnitude Indeed the macroscopic properties of materials and complex fluids are ultimately to be deduced from the dynamics of the microscopic molecular level In these lectures internationally renowned experts offer a tutorial presentation of novel approaches for bridging these space and time scales in realistic simulations This volume addresses graduate students and nonspecialist researchers from related areas seeking a high level but accessible introduction to the state of the art in soft matter simulations
