Computers in the Doctor's Office Stephen Radin, Harold Greenberg, 1984-09-01 *Computers in the Doctor's Office*
Stephen Radin, Harold M. Greenberg, 1984-01-01 National Bureau of Standards Monograph United States. National
Bureau of Standards, 1976 *Doctor's Office Computer Prep Kit* F.R. Jelovsek, 2012-12-06 Rick Jelovsek is one of the old
timers in computer medicine developing and using computer systems for over 15 years At Duke University he developed one
of the first computerized medical records for obstetrics and gynecology and collaborated with Drs Stead and Hammond in
the development of billing and accounting systems A founding member and current officer of the American Association for
Medical Systems and Informatics AAMSI he heads up and writes a quarterly newsletter for a special interest group in
computers for the American College of Obstetricians and Gynecologists He is a genuine medical computernik I was asked as
a favor to review his manuscript and suggest any needed changes before it was sent to a publisher He was not at that time
planning to send it to Springer Verlag Reading it was one of those pleasures I usually associate with a review article that
finally explains those things about a subject that I was aware of but never really understood I was familiar with practice
billing for example but didn't really know the whys and hows of it all Doctor's Office Computer Prep Kit has filled the gaps in

produced a review of the state of the art of that time and gave perspectives for future development Rienhoff O and Abrams M
E eds *The Computer in the Doctor's Office* Horth Holland Amsterdam 1980 In the meantime a rapid development has taken
place Therefore it seemed appropriate to hold another working conference which was conducted in Munich December 2-6
1985 The goal of this working conference was to review the developments in this field and to critically evaluate the progress
achieved so far The conference addressed general principles in system development and prerequisites for their successful
introduction into routine use Furthermore the topics of expert systems and new technologies were discussed in the context of
their usefulness and usability in ambulatory care systems As before it became very clear that actual computer systems to sup
port ambulatory and or primary care have to meet the conditions of the health care delivery systems into which they are to
