Ethics and Technology Herman T. Tavani, 2004 Explores current issues in the field of cyberethics including questions about online personal privacy sharing music and unreliable software and analyzes the practical moral and legal implications of each issue

Readings in Cyberethics Richard A. Spinello, Herman T. Tavani, 2001 This book of readings is ideal for ethics instructors looking for up to date and provocative material in the evolving fields of computer and Internet ethics

Computing and Philosophy in Asia Soraj Hongladarom, 2007 This volume is a collection of selected papers presented at the Second Asia Pacific Computing and Philosophy Conference which was held in Bangkok Thailand in January 2005 The conference was organized by the Center for Ethics of Science and Technology Chulalongkorn University on behalf of the International Association of Computing and Philosophy www.ia-cap.org Computing have had a long relationship with philosophy starting from the problem of how symbols being manipulated in computing bear a relation to the outside world to those of artificial intelligence robotics computer simulation and so on Moreover as computer technologies have become thoroughly pervasive in today s environment there are also issues concerning social and ethical impacts brought about by them The papers in the volume represent a wide variety of concerns and various dimensions within which computing and philosophy are related Furthermore it also represents some of the first attempts to highlight cultural dimensions of computing and philosophy which became prominent when the conference was held for the first time within the milieu of an Asian culture The First Asia Pacific Computing and Philosophy was held in Canberra Australia Hence many of the papers in the volume address this added dimension Apart from the usual problems of how computers and human lives are

interconnected the papers here also discuss how computers are related to human lives as lived in a specific culture Thus the book breaks a new ground and should be of interest to a wide range of scholars and students who are interested not only on computing and philosophy generally construed but also on this exciting new dimension of how the cultures of Asia the West and others bear upon the traditional issues in computing and philosophy and on how this dimension raises some new concerns and agenda Among the topics discussed in this volume are political online forums in Saudi Arabia e democracy and structural transformation of public sphere the Buddhist informational person a glance into the lives of computerized generation in Thailand technology and journalism in the market local approaches and global potential of information ethics computer enhanced good life computer teaching ethics and many others *Information Security and Ethics* Hamid R. Nemati,2008 This six volume set serves as the ultimate source on all theories and models associated with information privacy and safeguard practices to help anchor and guide the development of technologies standards and best practices to meet these challenges **Virtual Morality** Mark J. P. Wolf,2003 Table of contents *Ethical and Social Issues in the Information Age* Joseph Migga Kizza,2007-07-05 viii As we look for such a strategy technological development races on with new technologies that make our efforts and existing technologies on which they are based obsolete in shorter and shorter periods For example when I started to write the first edition in 1996 computer networking and associated computer network security were not big the Internet and associated d coms were yet to become commercialized and associated with big money and mass global computer network attacks like Malissa Love Boy and Distributed Denial of Services DDOS were unknown All these illustrate the speed at which the computing environment is changing and demonstrate a need for continuous review of the computer s ence education in both content and pedagogy So the focus in this edition is to address those changes In this edition I have made major changes in some of the chapters reorganized others and added new ones to bring the book update with current issues **Communication Research Trends** ,2005 **American Book Publishing Record** ,2003

Ethical and Social Issues in the Information Age Joseph M. Kizza,2007-06-02 Since the publication of the rst edition in 1997 there have been tremendous changes in the elds of computer science and information sciences During this period we have become more dependent than ever before on computer and telecommunication technology As we both individually and as nations become more dependent on cyberspace technology it has itself become a cr ical component of individual nation s security infrastructures that control power grids gas and oil storage facilities transportation and all forms of tional communication including emergency services The recent rise in cyber attacks many of them with lightning speed fecting millions of computers worldwide and causing billions of dollars in losses both to individuals and businesses is an indication of how unprepared we are to handle such attacks not only today but also in the future Such tacks are a mark of the poor state of our cyberspace security policies The facts that there are no signs to indicate there is going to be a slowdown in such tacks and that nations are not doing anything worth calling preventive has heightened the need for an effective strategy to produce

responsible professionals who can play an active role in the fight against computer and cyber attacks and vandalism
