Statistical Thinking in Business, Second Edition J. A. John, D. Whitaker, D. G. Johnson, 2005-08-29 Business students need the ability to think statistically about how to deal with uncertainty and its effect on decision making in business and management Traditional statistics courses and textbooks tend to focus on probability mathematical detail and heavy computation and thus fail to meet the needs of future managers Statistical Thinking in Business Second Edition responds to the growing recognition that we must change the way business statistics is taught It shows how statistics is important in all aspects of business and equips students with the skills they need to make sensible use of data and other information The authors take an interactive scenario based approach and use almost no mathematical formulas opting to use Excel for the technical work This allows them to focus on using statistics to aid decision making rather than how to perform routine calculations New in the Second Edition A completely revised chapter on forecasting Re arrangement of the material on data presentation with the inclusion of histograms and cumulative line plots A more thorough discussion of the analysis of attribute data Coverage of variable selection and model building in multiple regression End of chapter summaries More end of chapter problems A variety of case studies throughout the book The second edition also comes with a wealth of ancillary materials provided on a CD ROM packaged with the book These include automatically marked multiple choice questions answers to questions in the text data sets Excel experiments and demonstrations an introduction to Excel and the StibStat Add In for stem and leaf plots box plots distribution plots control charts and summary statistics Solutions to end of chapter exercises and powerpoint slides for lecturers are available directly from the publisher

The Psychology of Reading

Mildred C. Robeck, Randall R. Wallace, 2017-11-06 The need to know why as well as how children and youth respond as they do to reading instruction has guided the selection of this book's content The second edition of this title originally published in 1990 has retained and elaborated upon the three major themes previously presented that reading is a linguistic process that motivation the affective domain may be as important in learning to read as the cognitive domain and that the reality of learning theory is to be found in the mechanisms of the brain where information is mediated and memory traces are stored The text integrates views from cognitive psychology psycholinguistics and neuropsychology as they relate to reading and writing A learning motivation model is provided to present associative learning conceptualization and self directed reading in a hierarchical relationship with distinct cognitive and affective components The distinction between beginning and proficient reading is maintained throughout the text
