Archaeology: Down to Earth David Hurst Thomas, Robert L. Kelly, 2007 This new brief edition pairs two of archaeology's most recognized names David Hurst Thomas of the American Museum of Natural History and Robert L. Kelly of the University of Wyoming to bring a passionate down to earth introduction to archaeological method and theory to the classroom Designed both for students who intend on pursuing a career in archaeology as well as those who do not the authors give students a more immediate concrete impression of what the practice of archaeology is all about They include well chosen examples that show how archaeologists have worked through actual problems in the field and in the lab After using this text students will be better able to ask questions solve problems and discern truth from fiction Students will not only learn about the nature of archaeological data and how archaeologists do such things as archaeological survey and excavation they will also develop their sense of scientific logic and gain a better understanding of what career opportunities are available for archaeologists This edition is enhanced with new pedagogical features many more photos and a completely new design to help students prioritize and learn the material presented A rich array of supplemental resources includes a new companion website as well as the option to use a new CD ROM DOING FIELDWORK ARCHAEOLOGICAL DEMONSTRATIONS also developed by the authors Important Notice Media content referenced within the product description or the product text may not be available in the ebook version

Archaeology Robert L. Kelly, David Hurst Thomas, 2010 This new brief edition pairs two of archaeology's most recognized names David Hurst Thomas of the American Museum of Natural History and Robert L. Kelly of the University of Wyoming The authors passionate down to earth introduction to archaeological method and theory makes the book ideal for all students whether or not they intend to pursue a career in archaeology Students will gain an immediate concrete impression of what the practice of archaeology involves The authors include well chosen examples to show how archaeologists have worked through actual problems in the field and in the lab After using this text students will be better able to ask questions solve problems and discern truth from fiction They will learn about the nature of archaeological data and how archaeologists do such things as archaeological survey and excavation They will also develop their sense of scientific logic and gain a better understanding of career opportunities available to archaeologists This edition is enhanced with a new full color design that improves the visual presentation and enables students to more clearly see the key points of an image A rich array of supplemental resources includes a new companion website as well as the option to use the DOING FIELDWORK ARCHAEOLOGICAL DEMONSTRATIONS CD ROM Version 2.0 also developed by the authors

CD-ROM: Doing Fieldwork: Archaeological Excavations Robert L. Kelly, David Hurst Thomas, 2010-03-08 Show your students actual archaeological digs This CD developed by the authors and updated for this edition shows professional archaeologists involved in various digs many of which are referenced in the text The CD illustrates field techniques gives students perspective about what they're learning reinforces concepts and techniques via live examples and encourages students to participate in a dig

themselves The presentation is organized by the main techniques used on an archaeological dig Viewers are taken through each step automatically or can navigate to any point via the navigation bar Students can review illustrations and video clips of each technique After reviewing a step in the dig process students are taken to Check Points which are concept questions about each step of the dig Students can see the answers receive their scores and email the scores to you Twenty-five Years of Archaeology in Gloucestershire Bristol and Gloucestershire Archaeological Society, Cotswold Archaeology, 2006

Twenty five years is a long time in the study of prehistory and these papers given at a conference in Cheltenham in 2004 seek to review the excavations surveys chance finds and serious investigations carried out over two and a half decades **The Quality of the Archaeological Record** Charles Perreault, 2019-09-16 Paleobiology struggled for decades to influence our understanding of evolution and the history of life because it was stymied by a focus on microevolution and an incredibly patchy fossil record But in the 1970s the field took a radical turn as paleobiologists began to investigate processes that could only be recognized in the fossil record across larger scales of time and space That turn led to a new wave of macroevolutionary investigations novel insights into the evolution of species and a growing prominence for the field among the biological sciences In The Quality of the Archaeological Record Charles Perreault shows that archaeology not only faces a parallel problem but may also find a model in the rise of paleobiology for a shift in the science and theory of the field To get there he proposes a more macroscale approach to making sense of the archaeological record an approach that reveals patterns and processes not visible within the span of a human lifetime but rather across an observation window thousands of years long and thousands of kilometers wide Just as with the fossil record the archaeological record has the scope necessary to detect macroscale cultural phenomena because it can provide samples that are large enough to cancel out the noise generated by micro scale events By recalibrating their research to the quality of the archaeological record and developing a true macroarchaeology program Perreault argues archaeologists can finally unleash the full contributive value of their discipline

The Aesthetics of Scientific Experiments Milena Ivanova, Alice Murphy, 2023-06-16 The relationship between aesthetics and science has begun to generate substantial interest However for the most part the focus has been on the beauty of theories and other aspects of scientific practice have been neglected This book offers a novel perspective on aesthetics in experimentation via ten original essays from an interdisciplinary group comprised of philosophers historians of science and art and artists The collection provides an analysis of the concept of beauty in the evaluation of experiments What properties do practising experimenters value How have the aesthetic properties of scientific experiments changed over the years Secondly the volume looks at the role that aesthetic factors including negative values such as ugliness as well as experiences of the sublime and the profound play in the construction of an experiment and its reception Thirdly the chapters provide in depth historical case studies from the Royal Society which also allows for a study of the depiction of scientific experiment in artworks as well as contemporary examples from the Large Hadron Collider and cases of experiments

designed by artificial intelligence Finally it offers an exploration of the commonalities between how we learn from experiments on the one hand and the cognitive value of artworks on the other The Aesthetics of Scientific Experiments will be of interest to researchers and advanced students working in philosophy and history of science philosophy and history of art as well as practising scientists and science communicators

Critical Archaeology in the Digital Age Kevin Garstki,2022-02-01 Every part of archaeological practice is intimately tied to digital technologies but how deeply do we really understand the ways these technologies impact the theoretical trends in archaeology how these trends affect the adoption of these technologies or how the use of technology alters our interactions with the human past This volume suggests a critical approach to archaeology in a digital world a purposeful and systematic application of digital tools in archaeology This is a call to pay attention to your digital tools to be explicit about how you are using them and to understand how they work and impact your own practice The chapters in this volume demonstrate how this critical reflexive approach to archaeology in the digital age can be accomplished touching on topics that include 3D data predictive and procedural modelling digital publishing digital archiving public and community engagement ethics and global sustainability The scale and scope of this research demonstrates how necessary it is for all archaeological practitioners to approach this digital age with a critical perspective and to be purposeful in our use of digital technologies
