## **Doing Team Ethnography:**

**Doing Team Ethnography** Ken C. Erickson, Donald Stull, 1998 Whether the goals of research are applied or more abstract team research has been an important aspect of ethnography In *Doing Team Ethnography* the latest volume in the Qualitative Research Methods series authors Ken Erickson and Donald Stull examine the myriad of challenges and opportunities in doing team ethnography From setting goals and putting together a team to observing sharing and collaborating on a finished product *Doing Team Ethnography* provides clear and practical advice to researchers at any level or in any discipline

***Doing Ethnography in Teams*** Teena Clerke, Nick Hopwood, 2014-04-15 This uniquely in depth book offers a blow by blow account of the sometimes problematic dynamics of conducting collaborative fieldwork in ethnography Tracing the interplay between co researchers at various points of contact in both professional and personal relations the analysis draws out the asymmetries which can develop among team members nominally working towards the same ends It details the often complex dialogues that evolve in an attempt to navigate conflicting interests such as team members resistances to particular methodological recipes or research protocols The authors show that such debates can create an open forum to negotiate new practices A key element of this publication is that it goes beyond an analysis of more traditional power relations in research teams comprising members at different academic pay grades As well as drawing attention to gender related dynamics in research collaborations the authors use themselves as an exemplar to demonstrate how differences in age experience knowledge professional skills and background can be exploited to generate positive outcomes constituting much more than the apparent sum of their parts In doing so the authors reveal the delightful surprising and yet challenging aspects of research collaboration that are often absent from the qualitative literature

***Ethnographic Methods*** Karen O'Reilly, 2012-03-12 This best selling book designed for researchers embarking on their first ethnographic project has been substantially revised and updated with lots of exercises and advice to guide the embodied and creative practice of ethnography New additions include cyber ethnography sensual visual and mobile ethnographies and field walking
