

**This structural change is frequently attributed to deregulation of the financial services industry.**

---

- **In fact, deregulation was a natural response to increased competition between depository institutions and nondepository financial firms, and between the same type of competitors across world markets.**
- **In fact, some regulations can be credited for the development of new products to avoid regulation—hence increased competition from firms not regulated like a bank; i.e., investment banks.**

Reinicke, 1995 Banking Politics and Global Finance presents an innovative micro political examination of the US banking system s response to the ongoing globalization of financial markets This approach contrasts sharply with earlier studies which have emphasized the macro structural aspects of politics through concentrating on elements of stability and consistency in the policy responses by advanced industrial countries to external economic pressures By micro political analysis of policy making this book reveals a multitude of changes in the interests coalitions and power constellations among private and public sector actors and institutions in the US financial system in the absence of any macrostructural adjustment These changes have opened alternative channels for policy making leading to substantial adjustments in the regulatory framework governing US financial markets Using detailed discussion of the unsuccessful attempts to repeal the law that separates commercial from investment banking the Glass Steagall Act and the successful raising of the capital standards of US commercial banks Dr Reinicke s book also explains why the same policy network can respond very differently to an external economic challenge a phenomenon usually neglected in the literature on comparative political economy

Thailand:Financial Sector Reform and the East Asian Crises Tull Traisaorat,2000-02-23 This book takes as its focus the current supervisory and regulatory framework for bank supervision in Thailand and the Thai authorities efforts to modernise and restructure the Thai banking system It examines the obstacles to this restructuring which include the current economic difficulties in Thailand and the East Asia region as well as more fundamental historical cultural and socio economic factors that underpin Thai society The book looks at the numerous banking statutes put in place in Thailand in the past sixty years including legislation of the 1980s in response to problems involving fraud insider dealing and solvency concerns It examines how historically ambiguous structures of governmental responsibility and power and a heavy emphasis on government discretion in regulation have so far inhibited the effectiveness of this extensive body of legislation in developing a sound modern banking system There follows an in depth analysis of the 1997 1998 Thai Banking Crisis and ways in which lessons can be learned to avoid similar crises in future The author argues for a greater degree of transparency in the regulatory process to bring it into line with internationally accepted standards for increased supervisory implementation and enforcement by Thai governmental authorities and for the ultimate depoliticisation of the bank regulatory and supervisory processes
