Call Of Conscience:

The Call of Conscience Michael J. Hyde, 2001 This study considers the relationship between the phenomenon of conscience and the practice of rhetoric as it relates to one of the most controversial issues of our time euthanasia The author offers an extensive treatment of Heidegger's and Levinas' philosophical investigations of conscience Conscience and Attestation Gregor Bartolomeus Kasowski, 2011 *Meaning and Authenticity* Brian J. Braman, 2008-03-01 The language of self-fulfillment, self-realization and self-actualization in short, authenticity has become common in contemporary culture The desire to be authentic is implicitly a desire to shape one's self in accordance with an ideal and the concern for what it means to be authentic is in many ways the modern form of the ancient question: what is the life of excellence However, this notion of authenticity has its critics Christopher Lasch, for instance, who equates it with a form of narcissism and Theodor Adorno, who views it as a glorification of privatism Brian J. Braman argues that despite such criticisms it is possible to speak about human authenticity as something that addresses contemporary concerns as well as the ancient preoccupation with the nature of the good life He refers to the work of Bernard Lonergan and Charles Taylor, thinkers who place a high value on the search for human authenticity Lonergan discusses authenticity in terms of a three-fold conversion: intellectual, moral, and religious while Taylor views authenticity as a rich, vibrant, and important addition to conversations about what it means to be human *Meaning and Authenticity* is an engaging dialogue between these two thinkers, both of whom maintain that there is a normative conception of authentic human life that overcomes moral relativism, narcissism, privatism, and the collapse of the public self

The Phenomenology of Moral Normativity William Smith, 2013-02-28 Why should I be moral? Philosophers have long been concerned with the legitimacy of morality's claim on us, especially its ostensible aim to motivate certain actions of all persons unconditionally This problem of moral normativity has received extensive treatment in analytic moral theory, but little attention has been paid to the potential contribution that phenomenology might make to this central debate in metaethics In *The Phenomenology of Moral Normativity* William H. Smith takes up the question of morality's legitimacy anew, drawing contemporary moral philosophers into conversation with the phenomenological philosophy of Husserl, Heidegger, and Levinas Utilizing a two-part account of moral normativity, Smith contends that the ground of morality itself is second-personal, rooted in the ethical demand intrinsic to other persons, while the ground for particular moral obligations is first-personal, rooted in the subject's avowal or endorsement of certain moral norms within a concrete historical situation Thus, Smith argues, phenomenological analysis allows us to make sense of an idea that has long held intuitive appeal but that modern moral philosophy has been unable to render satisfactorily, namely, that the normative source of valid moral claims is simply other persons and what we owe to them

The Fourth Way P.D. OUSPENSKY,2025-10-31 The Fourth Way is the most influential work of P D Ouspensky a disciple of the Russian mystic Georges Ivanovich Gurdjieff Published in 1957 it compiles lectures dialogues and teachings given between 1921 and 1947 in which Ouspensky systematically presents Gurdjieff's philosophy and method for spiritual development The title refers to an alternative path to the three traditional ways of inner evolution that of the fakir mastery of the body the monk control of emotions and the yogi discipline of the mind Ouspensky presents the Fourth Way as an integral method that can be practiced in daily life without the need for withdrawal from the world balancing body mind and emotions in order to achieve full consciousness The book addresses fundamental themes such as the nature of man the levels of consciousness the struggle against mechanical life the role of attention and the possibility of awakening through conscious effort With a clear and structured style Ouspensky offers a theoretical and practical guide that has inspired generations of spiritual seekers It has become a classic of twentieth century esoteric literature and an essential reference for those wishing to understand and apply the teachings of Gurdjieff [The Fourth Way: A Record of Talks and Answers to Questions Based on the Teaching of G. I. Gurdjieff](#) Peter Demianovich Ouspensky,2020-09-28 BEFORE I BEGIN TO EXPLAIN TO YOU in a general way what this system is about and to talk about our methods I want particularly to impress on your minds that the most important ideas and principles of the system do not belong to me This is chiefly what makes them valuable because if they belonged to me they would be like all other theories invented by ordinary minds they would give only a subjective view of things When I began to write A New Model of the Universe in 1907 I formulated to myself as many other people have done before and since that behind the surface of the life which we know lies something much bigger and more important And I said to myself then that until we know more about what lies behind all our knowledge of life and of ourselves is really negligible I remember one conversation at that time when I said If it were possible to accept as proven that consciousness or

as I should call it now intelligence can manifest itself apart from the physical body many other things could be proved Only it cannot be taken as proved I realized that manifestations of supernormal psychology such as thought transference clairvoyance the possibility of knowing the future of looking back into the past and so on have not been proved So I tried to find a method of studying these things and worked on that line for several years I found some interesting things in that way but the results were very elusive and though several experiments were successful it was almost impossible to repeat them I came to two conclusions in the course of these experiments first that we do not know enough about ordinary psychology we cannot study supernormal psychology because we do not know normal psychology Secondly I came to the conclusion that certain real knowledge exists that there may be schools which know exactly what we want to know but that for some reason they are hidden and this knowledge is hidden So I began to look for these schools I travelled in Europe Egypt India Ceylon Turkey and the Near East but it was really later when I had already finished these travels that I met in Russia during the war a group of people who were studying a certain system which came originally from Eastern schools This system began with the study of psychology exactly as I had realized it must begin The chief idea of this system was that we do not use even a small part of our powers and our forces We have in us so to speak a very big and very fine organization only we do not know how to use it In this group they employed certain oriental metaphors and they told me that we have in us a large house full of beautiful furniture with a library and many other rooms but we live in the basement and the kitchen and cannot get out of them If people tell us about what this house has upstairs we do not believe them or we laugh at them or we call it superstition or fairy tales or fables This system can be divided into study of the world on certain new principles and study of man The study of the world and study of man include in themselves a kind of special language We try to use ordinary words the same words as we use in ordinary conversation but we attach a slightly different and more precise meaning to them Study of the world study of the universe is based on the study of some fundamental laws which are not generally known or recognized in science The two chief laws are the Law of Three and the Law of Seven which will be explained later Included in this and necessary from this point of view is the principle of scale a principle which does not enter into ordinary scientific study or enters very little The study of man is closely connected with the idea of the evolution of man but the evolution of man must be understood in a slightly different way from the ordinary Ordinarily the word evolution applied either to man or to anything else presupposes a kind of mechanical evolution I mean that certain things by certain known or unknown laws transform into other things and these other things transform into still others and so on But from the point of view of this system there is no such evolution at all I do not speak in general but specifically of man The evolution of man if it occurs can only be the result of knowledge and effort as long as man knows only what he can know in the ordinary way there is no evolution for him and there never was any evolution for him Serious study begins in this system with the study of psychology that is to say with the study of oneself because psychology cannot be studied as astronomy can outside oneself A man has to

study himself When I was told that I saw at once that we do not have any methods of studying ourselves and already have many wrong ideas about ourselves So I realized that we must get rid of wrong ideas about ourselves and at the same time find methods for studying ourselves Perhaps you realize how difficult it is to define what is meant by psychology There are so many meanings attached to the same words in different systems that it is difficult to have a general definition So we begin by defining psychology as study of oneself You have to learn certain methods and principles and according to these principles and using these methods you will try to see yourselves from a new point of view *The Forum* Loretta Sutton
