The Transformation of Islamic Art during the Sunni Revival Yasser Tabbaa,2011-10-01 The transformation of Islamic architecture and ornament during the eleventh and twelfth centuries signaled profound cultural changes in the Islamic world Yasser Tabbaa explores with exemplary lucidity the geometric techniques that facilitated this transformation and investigates the cultural processes by which meaning was produced within the new forms Iran Iraq and Syria saw the development of proportional calligraphy vegetal and geometric arabesque muqarnas stalactite vaulting and other devices that became defining features of medieval Islamic architecture Ultimately the forms and themes described in this book shaped the development of Mamluk architecture in Egypt and Syria and by extension the entire course of North African and Andalusian architecture as well These innovations developed and were disseminated in a highly charged atmosphere of confrontation between the Seljuk and post Seljuk proponents of the traditionalist Sunni revival and their main opponents in Fatimid Egypt These forms stood as visual signs of allegiance to the orthodox Abbasid caliphate and of difference from the heterodox Fatimids Tabbaa proposes that their rapid spread throughout the Islamic world operated within a system of reciprocating ceremonial gestures which conveyed a new and formal language that helped negotiate the gap between the myth of a unified Sunni Islam and its actual political fragmentation In subject matter and approach The Transformation of Islamic Art during the Sunni Revival makes original contributions to the study of art revealing that this relatively neglected sector of medieval art and architecture is of critical importance for reevaluating the entire field of Islamic studies It challenges the essentialist and positivist approaches that still permeate the study of Islamic art and offers a historical and semiotic alternative for exploring meaning within ruptures of change
