A Question Of Balance:

A Question of Balance National Research Council, Division on Engineering and Physical Sciences, Commission on Physical Sciences, Mathematics, and Applications, Committee for a Study on Promoting Access to Scientific and Technical Data for the Public Interest, 2000-01-15 New legal approaches such as the European Union's 1996 Directive on the Legal Protection of Databases and other legal initiatives now being considered in the United States at the federal and state level are threatening to compromise public access to scientific and technical data available through computerized databases. Lawmakers are struggling to strike an appropriate balance between the rights of database rights holders who are concerned about possible commercial misappropriation of their products and public interest users of the data such as researchers, educators, and libraries. *A Question of Balance* examines this balancing act. The committee concludes that because database rights holders already enjoy significant legal, technical, and market-based protections, the need for statutory protection has not been sufficiently substantiated. Nevertheless, although the committee opposes the creation of any strong new protective measures, it recognizes that some additional limits against wholesale misappropriation of databases may be necessary. In particular, a new properly scoped and focused U.S. statute might provide a reasonable alternative to the European Union's highly protectionistic database directive. Such legislation could then serve as a legal model for an international treaty in this area. The book recommends a number of guiding principles for such possible legislation as well as related policy actions for the administration.

A Question of Balance Michael Creswell, 2006-10-31 Challenging standard interpretations of American dominance and French weakness in postwar Western Europe. Michael Creswell argues that France played a key role in shaping the cold war order. In the decade after the war, the U.S. government's primary objective was to rearm the Federal Republic of Germany within the framework of a European defense force, the European Defense Community. American and French officials differed, however, over the composition of the EDC and the rules governing its organization and use. Although U.S. pressure played a part, more decisive factors in both internal French politics and international French concerns ultimately led France to sanction the plan to rearm West Germany. Creswell sketches the successful French challenge to the United States, tracing the genuine, sometimes heated debate between the two nations that ultimately resulted in security arrangements preferred by the French but acceptable to the Americans. Impressively researched and vigorously argued, *A Question of Balance* advances significantly our understanding of power politics and the rise of the cold war system in Western Europe.
