A Pitch Of Philosophy Autobiographical Exercises:

A Pitch of Philosophy Stanley Cavell, 1996-02 Annotation What is the pitch of philosophy Something thrown for us to catch A lurch meant to unsettle us The relative position of a tone on a scale A speech designed to persuade This book is an invitation to the life of philosophy in the United States as Emerson once lived it and as Stanley Cavell now lives it in all its topographical ambiguity Cavell talks about his vocation in connection with what he calls voice the tone of philosophy and his right to take that tone and to describe an anecdotal journey toward the discovery of his own voice Cavell asks how the voice of philosophy can be heard amid the commerce of everyday life His autobiographical exercises begin at home with his parents his father an accidental pawnbroker and accomplished raconteur his mother a trained and talented musician In the course of showing us his certain steps in the discovery of his trade he conveys the sense of what it means to learn to walk on one's own with a Thoreauvian deliberateness He pays suitable attention to a serious ally and antagonist to the task of philosophy as he understands it namely Jacques Derrida yet Derrida has mounted a full scale attack on voice and other concepts that Cavell has held open for much of a lifetime The chapters are interwoven with intense family reminiscences in Cavell's discovery of J L Austin his understanding of Wittgenstein his raising of Emerson to the philosophical canon his fascination with film images of women in a medium for women the revelation that film and opera are the media of otherness for women And the voice at the end hearing in himself the voice of his mother which is music Complex sentimental witty A Pitch of Philosophy is for anyone who cares to take on philosophy under whatever name it goes *The Educator and The Ordinary* Elizabeth O'Brien, 2023-08-14 This book creates a unique discursive environment to consider how initial teacher education can support student teachers in practical and personal senses in what they can do and who they are What is it to care To develop our voice To educate in beautifully risky ways Engaging with the philosophy of Stanley Cavell Gert Biesta and Nel Noddings central capabilities of the educator are suggested Acknowledgement Autobiography Imagination Interruption Attention and Uncertainty culminating in the essential unifying capability of The Ordinary underpinned by Complexity and Hope This book will appeal to those interested and engaged in initial teacher education professional development and support from early years to higher education and practicing educators It aims to enrich theoretical as well as practical discussion to influence how we live how we think and how we treat each other **Constellations of a Contemporary Romanticism** Jacques Khalip, Forest Pyle, 2016-07-01 Constellations of a Contemporary Romanticism takes its title and point of departure from Walter Benjamin's concept of the historical constellation which puts both contemporary and romanticism in play as period designations and critical paradigms Featuring fascinating and diverse contributions by an international roster of distinguished scholars working in and out of romanticism from deconstruction to new historicism from queer theory to postcolonial studies from visual culture to biopolitics this volume makes good on a central tenet of Benjamin's conception of history These critics grasp the constellation into which our own era has formed with a definite earlier one

Each of these essays approaches romanticism as a decisive and unexpired thought experiment that makes demands on and poses questions for our own time What is the un-lived of a contemporary romanticism What has romanticism's singular untimeliness bequeathed to futurity What is romanticism's contemporary redemption value for painting and politics philosophy and film

Fulbright Labyrinths Virginia Hall-Milhouse, 2011-11-28 In this provocative work Virginia Milhouse demonstrates how autoethnography combines creative and analytical practices to help bring to consciousness some complex social and political agendas hidden in narratorial writings It demonstrates how an arts based qualitative research method narrative inquiry can be fused with a scientific based quantitative method DMIS IDI and compliment support and or correct each other It also demonstrates how writing as a method of inquiry can be a viable way for researchers to learn about themselves and their research as well as features standards for evaluating creatively and analytically constructed text Further the author's examination of the aesthetics of inner readiness and in betweenness will be very helpful to people doing this kind of self reflexive fieldwork The reader will also appreciate this author's recognition of the importance of combining qualitative and quantitative methodologies something not many writers can do with great success Also this book will be a real contribution to sojourners and others traveling or living abroad The work is very smart and is beautifully and clearly written The labyrinth quote at the beginning of her work is very fitting and certainly promises to illustrate those words

Inheriting Stanley Cavell David LaRocca, 2020-06-25 Some of the people who knew Stanley Cavell best or know his work most intimately are gathered in *Inheriting Stanley Cavell* to lend critical insight into the once and future legacy of this American titan of thought Former students colleagues long time friends as well as distant admirers explore moments when their personal experiences of Cavell's singular philosophical and literary illuminations have as he put it risen to the level of philosophical significance Many of the memories dreams and reflections on offer in this volume carry with them a welcome register of the autobiographical expressing much as Cavell did through his own writing how the personal can become philosophical and thus provide a robust mode for the making of meaning and the clarifying of the human condition Here in varied styles and through a range of dynamic content authors engage the lingering question of inheriting philosophy in whatever form it might take and what it means to think about inheritance and enact it

What is a Woman? Toril Moi, 1999 What is a woman And what does it mean to be a feminist today In her first full scale engagement with feminist theory since her internationally renowned *Sexual Textual Politics* 1985 Toril Moi challenges the dominant trends in contemporary feminist and cultural thought arguing for a feminism of freedom inspired by Simone de Beauvoir's *The Second Sex* Written in a clear and engaging style What is a Woman brings together two brand new book length theoretical interventions Mois work on Freud and Bourdieu and her studies of desire and knowledge in literature In the controversial title essay Toril Moi radically rethinks current debates

about sex gender and the body challenging the commonly held belief that the sex gender distinction is fundamental to all feminist theory Moi rejects every attempt to define masculinity and femininity including efforts to define femininity as that which cannot be defined In the second new book length essay I am a Woman Toril Moi reworks the relationship between the personal and the philosophical pursuing ways to write theory that do not neglect the claims of the personal Setting up an encounter between contemporary theory and Simone de Beauvoir Moi radically rethinks the need and difficulty of finding one's own philosophical voice by placing it in new theoretical contexts A sustained refusal to lay down theoretical or political requirements for femininity and a powerful argument for a feminism of freedom What is a Woman is a deeply original contribution to feminist theory

The Corporeal Turn John Tambornino, 2002-06-03 In The Corporeal Turn John Tambornino offers a thorough rethinking of ethical and political theory by emphasizing human embodiment and the primacy of passion and need in response to the neglect of these matters in much of contemporary thought Tambornino calls for a corporeal turn or as he explains sustained attention to human embodiment something that is often occluded when priority is given to reason or language Working through a diverse set of thinkers exploring such themes as necessity and freedom need and desire nature and convention and public and private and noting vivid instances of politicized embodiment Tambornino takes seriously Nietzsche's claim that philosophy has largely been an interpretation and a misunderstanding of the body The result is nothing less than a new orientation to ethical and political theory one that appreciates the complex relations of language culture politics and corporeality and a powerful intervention into these domains
