American Strategy In The Atomic Age:

American Strategy in the Atomic Age George Cooper Reinhardt, 1965 To Kill Nations Edward Kaplan, 2015-03-24 Edward Kaplan's *To Kill Nations* is a fascinating work that packs a thermonuclear punch of ideas and arguments. The work is suitable for anyone from advanced undergraduates to experts in the field. *Strategy Bridge In To Kill Nations* Edward Kaplan traces the evolution of American strategic airpower and preparation for nuclear war from this early air atomic era to a later period 1950-1965 in which the Soviet Union's atomic capability accelerated by thermonuclear weapons and ballistic missiles made American strategic assets vulnerable and gradually undermined air atomic strategy. Kaplan throws into question both the inevitability and preferability of the strategic doctrine of MAD. He looks at the process by which cultural, institutional, and strategic ideas about MAD took shape and makes insightful use of the comparison between generals who thought they could win a nuclear war and the cold institutional logic of the suicide pact that was MAD. Kaplan also offers a reappraisal of Eisenhower's nuclear strategy and diplomacy to make a case for the marginal viability of air atomic military power even in an era of ballistic missiles. National Security, Military Power & the Role of Force in International Relations Army Library (U.S.), United States. Department of the Army, 1976 American Strategy in the Nuclear Age David W. Tarr, 1966 *Air University Library Index to Military Periodicals*, 1955 National Security, Military Power & the Role of Force in International Relations United States. Department of the Army, 1976 **Bernard Brodie and the Foundations of American Nuclear Strategy** Barry Howard Steiner, 1991 Steiner analyzes how and why Brodie's understanding of weapons of unparalleled explosive force led him to posit the need for revolutionary strategic thinking in broadminded analytic method and in the focus upon cities as nuclear targets. He shows the tremendous effect Brodie's work had on the intellectual climate in which policy is determined, particularly in his frequent combatting of conventional wisdom. *Russian View of U.S. Strategy* Jonathan Samuel Lockwood, Kathleen O'Brien Lockwood, 1993 Soviet perceptions of U.S. strategy remained remarkably consistent from the post-Stalin period through the collapse of communism in Eastern Europe and the Soviet Union itself. The consistency of the Soviet tendency to engage in the mirror image fallacy in their analyses of U.S. doctrine and strategic intentions has profound implications for the future relationship of the U.S. and the now independent republics. This authoritative volume analyzes the Soviet/Russian perspectives of U.S. strategic evolution from the declaration of the massive retaliation doctrine of 1954 through the Soviet collapse of 1991. The Soviets considered the growth of their strategic nuclear arsenal as the main factor giving them political leverage over U.S. foreign policy and predicted that a defense policy based on strategic defense would be the most effective deterrent from a Soviet perspective. Now the Russian military and political leadership places a high value on strategic nuclear forces in terms of political leverage and prestige. Building upon a wide variety of international sources, the Lockwoods offer a penetrating assessment of how the present Russian perspective will affect political relationships not only with the U.S. and the West but also among the independent republics. This factor will

become ever more critical as they vie for decentralized versus unified control of what was the Soviet nuclear arsenal under the shadow of the collapsing economies The authors also introduce a new theory concerning the future impact of ballistic missile defense on operational warfare in light of the U S experience in Operation Desert Storm The Russian View of U S Strategy provides a comprehensive historical context and an up to date appraisal of an uncertain and potentially volatile development in U S Russian relations It will be of interest to historians policymakers and military analysts Air University Periodical Index ,1955 **Nuclear Statecraft** Francis J. Gavin,2012-10-16 We are at a critical juncture in world politics Nuclear strategy and policy have risen to the top of the global policy agenda and issues ranging from a nuclear Iran to the global zero movement are generating sharp debate The historical origins of our contemporary nuclear world are deeply consequential for contemporary policy but it is crucial that decisions are made on the basis of fact rather than myth and misapprehension In Nuclear Statecraft Francis J Gavin challenges key elements of the widely accepted narrative about the history of the atomic age and the consequences of the nuclear revolution On the basis of recently declassified documents Gavin reassesses the strategy of flexible response the influence of nuclear weapons during the Berlin Crisis the origins of and motivations for U S nuclear nonproliferation policy and how to assess the nuclear dangers we face today In case after case he finds that we know far less than we think we do about our nuclear history Archival evidence makes it clear that decision makers were more concerned about underlying geopolitical questions than about the strategic dynamic between two nuclear superpowers Gavin s rigorous historical work not only tells us what happened in the past but also offers a powerful tool to explain how nuclear weapons influence international relations Nuclear Statecraft provides a solid foundation for future policymaking American Strategy Urs Schwarz,1966 **A First Book on Fire Safety in the Atomic Age** Horatio Bond,1952 *Patterns of American Foreign Policy* Gene E.
