Americas Engineering Marvels:

America's Engineering Marvels Carol M. Highsmith, Carol Highsmith, Ted Landphair, 2004-01-06 Renowned photographer Carol M Highsmith and writer Ted Landphair take a fresh look at some of the most remarkable structures ever built in America Many of the sights included such as Hoover Dam were built to serve a critical function for others like the St Louis Arch or Mount Rushmore the function was purely aesthetic or commemorative But all are notable for their scale and the technological genius that went into constructing them Travel pictorial wizards Highsmith and Landphair turn themselves here to the wonder of industrial America The can do American spirit resonates behind every one of the sights included A tribute to some of the most enterprising ingenious and visionary minds of the last century this volume also reminds us of the lives lost and risks taken to get the job done The fantastic oversize full color photos of marvels like the Washington Monument Brooklyn Bridge and the 7 7 mile long Flathead Tunnel in Montana the world s seventh longest railroad tunnel are an unforgettable chronicle of American engineering at its best

Epic Achievements Against Incredible Odds Steve McCurdy, 2015-06-18 This is the fascinating story of how a few great Americans between 1930 and 1952 overcame incredible challenges to build some of the world s most remarkable architectural wonders Drawing upon his impressive knowledge of American history the author chronicles the country s emergence in the Roaring Twenties as the world s pre eminent builder of great dams bridges and skyscrapers He skillfully combines little known back stories with vintage photographs to show how America s architects engineers and contractors working with arcane technologies and slide rules used innovation ingenuity and inspiration to build some of the world s most extraordinary structures faster and better than they have been built before or since Mr McCurdy s narrative includes Hoover Dam In the depths of the Great Depression a man from Maine named Frank Crowe assembled a rag tag army of 5 000 unemployed men in the middle of the Mojave Desert Working in conditions that were sometimes brutal without the benefit of modern technologies Crowe and his men not only built the world s greatest dam but they finished it under budget two years ahead of schedule The Golden Gate Bridge In his account of the building of this celebrated bridge McCurdy tells the little known back story of Charles Ellis Fired by a boss jealous of his engineering genius Ellis worked tirelessly behind the scenes without pay or acknowledgement to write the bid specifications for every single component of the bridge Although he is now regarded as the father of the bridge Ellis received no recognition during his lifetime The Empire State Building Paul Starrett was an organizational genius and is often referred to as the father of the American skyscraper McCurdy tells the remarkable story of how in 1931 Starrett built the Empire State Building from ribbon cutting to completion in the astonishing time of 391 days a record which has never been challenged and which amazes structural engineers to this day The Pentagon Prior to the Japanese attack on Pearl Harbor in 1941 40 000 War Department personnel in Washington DC were spread out among 22 separate buildings One man was given the task of bringing them all together under one roof Less than eight months after he broke ground Brehon Burke Somervell

was moving employees into the world's largest building the 6.6 million square foot Pentagon The SS United States When he was eight years old William Francis Gibbs began dreaming of building the world's greatest ocean liner Fifty eight years later on May 14 1952 Gibbs guided his thousand foot long dream ship into open waters With the greatest power to weight ratio ever achieved in any passenger vessel the SS United States broke the transatlantic crossing speed record by 10 hours on her maiden voyage In the second half of *Epic Achievements Against Incredible Odds* the author carefully traces the country's post war decline as the world's great builder and identifies and analyzes the causes of its slide McCurdy ends his book with a frank and compelling assessment of how when and whether the United States will ever bounce back and re establish its supremacy as the world's master builder of architectural icons Order this book now to enjoy the unforgettable stories of the men behind some of history's most enduring engineering accomplishments **Engineering Marvels in American**

History Candace Brown, 2026-03 The chapters in this book feature projects dating back to 1851 and reaching into the 1960s All but two have to do with critical improvements to transportation such as the construction of bridges tunnels railroads and roadways so well designed and built that most remain in use today You will be stunned to read about how much of the work of building them especially in the earlier years was carried out by common laborers using only human muscle power and the simplest of hand tools These overworked underpaid men many of them immigrants risked their lives daily under miserable conditions that required great physical strength and endurance They faced rock slides avalanches falls explosives blazing heat or freezing cold working at great depths in underwater chambers filled with compressed air a then new and dangerous technology or at great heights without safety equipment One can only hope that when the job was finished they stood back and felt well earned satisfaction over the accomplishments that came from their sweat and teamwork Brilliant engineers created the designs but none would ever have become reality without the laborers and later construction workers who actually built them Both are the heroes of these stories And let us also give some thought to the many forgotten horses and mules who struggled and suffered in the early days *American Magazine*, 1925 *American Illustrated Magazine*, 1928
