## **A Potters Mexico:**

**A Potter's Mexico** Irwin Whitaker, Emily Whitaker, 1978-01-01     [Atzompa](#) Jean Clare Hendry, 1992     **Tarascan Pottery Production in Michoacán, Mexico** Eduardo Williams, 2017-08-31 This book examines a contemporary pottery tradition in Mesoamerica but also looks back to the earliest examples of cultural development in this area. By means of ethnographic analogy and ceramic ecology this study seeks to shed light on a modern indigenous community and on the theory method and practice of ethnoarchaeology.

**Portraits of Clay** Sandra S. Smith, 1997 Not long ago pottery was a lost art in Chihuahua Mexico. But in the 1970s near the ruins of Casas Grandes an art revolution was born. Inspired by ancient pottery fragments from a tradition that had disappeared before the arrival of the first Europeans a self-taught woodcutter turned artist reinvented an entire ceramic technology. Today Casas Grandes pottery made by hand from local clays and mineral colors by a handful of artists claims high prices and sets the standard for contemporary pottery. Photographer Sandra Smith traveled to Mata Ortiz to photograph the potters and to record their reflections on their work. Her portraits document their techniques collecting and preparing the clay forming by hand sanding and painting. They also capture intimate moments between artists and their art. For anyone who has ever admired Casas Grandes pottery *Portraits of Clay* is a beautiful introduction to the potters and their work.

**The New World Guides to the Latin American Republics: Mexico, Central America and the West Indies** Earl Parker Hanson, Raye Roberts Platt, 1945     [Pottery Economics in Mesoamerica](#) Christopher A. Pool, George J. Bey, 2022-08-23 Pottery is one of the most important classes of artifacts available to archaeologists and anthropologists. Every year volumes of data are generated detailing ceramic production distribution and consumption. How these data can be interpreted in relation to the social and cultural framework of prehistoric societies in Mesoamerica is the subject of this book. Nine chapters written by some of the most well-known and respected scholars in the field offer readers an in-depth look at key advances from the past fifteen years. These scholars examine ethnoarchaeological studies and the Preclassic Formative Classic and Postclassic periods and cover geographic areas from eastern to central Mesoamerica. In a series of case studies contributors address a range of new and developing theories and methods for inferring the technological organizational and social dimensions of pottery economics and draw on a range of sociopolitical examples. Specific topics include the impacts and costs of innovations the role of the producer in technological choices the outcomes when errors in vessel formation are tolerated or rectified the often undocumented multiple lives and uses of ceramic pieces and the difficulties associated with locating and documenting ceramic production areas in tropical lowlands. A compelling collection that clearly integrates and synthesizes a wide array of data this book is the definitive text on pottery economics in Mesoamerica and an important contribution to the fields of anthropology archaeology ancient history and the economics of pre-industrial societies.
