A Sense Of Direction:

A Sense of Direction William Ball, 1984 William Ball founder and general director of the acclaimed American Conservatory Theatre engages his audience in a wide ranging discussion of the director's process from first reading through opening night Mr Ball offers a candid personal account of his method of working including the choice of a play's essential elements preproduction homework casting and rehearsal techniques Cover [A Sense of Direction](#) Laura Sena, 1999-01-01 This state of the art program addresses directional confusion by targeting concepts such as left right forward backward and up down Children with learning or language disabilities learn body awareness and directional concepts relative first to themselves then to the environment and finally to others More than 40 lessons are developmentally sequenced in four levels from simple to advanced The book begins by teaching general body awareness as in Alligator where the child becomes aware of different body parts touching the floor as he moves The self becomes a reference point in Crumple where the blindfolded child identifies where she hears the paper crumbling around her right left in front etc The next level uses the environment as a reference point Students follow simple maps such as a prairie dog town mazes and floor grids made by creating squares with masking tape on the floor The last section uses others as reference points One activity has the child look at pictures of people in various poses identifying that person's left or right body parts

Structure, Information and Communication Complexity Bernard Mans, Paola Flocchini, Nicola Santoro, 1995 The ultimate goal of research in Distributed Computing is to understand the nature properties and limits of computing in a system of autonomous communicating agents To this end it is crucial to identify those factors which are significant for the computability and the communication complexity of problems A crucial role is played by those factors which can be termed Structural Information its identification characterization analysis and its impact on communication complexity is an important theoretical task which has immediate practical importance The purpose of the Colloquia on Structural Information and Communication Complexity SIROCCO is to focus explicitly on the interaction between structural information and communication complexity The Colloquia comprise position papers presentations of current research and group discussions Series 1 contains papers presented at the 1st Colloquium on Structural Information and Communication Complexity held in Ottawa Canada Series 2 contains papers presented at the 2nd Colloquium held in Olympia Greece

Memory in the Real World Gillian Cohen, 1996 This fully revised and updated third edition of the highly acclaimed Memory in the Real World includes recent research in all areas of everyday memory Distinguished researchers have contributed new and updated material in their own areas of expertise The controversy about the value of naturalistic research as opposed to traditional laboratory methods is outlined and the two approaches are seen to have converged and become complementary rather than antagonistic The editors bring together studies on many different topics such as memory for plans and actions for names and faces for routes and maps life experiences and flashbulb memory and eyewitness memory Emphasis is also given to the role of memory in consciousness and metacognition New topics

covered in this edition include life span development of memory collaborative remembering déjà vu and memory dysfunction in the real world Memory in the Real World will be of continuing appeal to students and researchers in the area **Why People Get Lost** Paul A. Dudchenko,2010 At some point in our lives most of us have been lost How does this happen What are the limits of our ability to find our way Do we have an innate sense of direction How people get lost reviews the psychology and neuroscience of navigation It starts with a history of studies looking at how organisms solve mazes It then reviews contemporary studies of spatial cognition and the wayfinding abilities of adults and children It then considers how specific parts of the brain provide a cognitive map and a neural compass This book also considers the neurology of spatial disorientation and the tendency of patients with Alzheimer s disease to lose their way Within the book the author proposes that we get lost because our brain s compass becomes misoriented This book is written for anyone with an interest in navigation and the brain It assumes no specialised knowledge of neuroscience but covers recent advances in our understanding of how the brain represents space Structure, Information and Communication Complexity, IIS 1 Paola

New Directions in the Russellian Theory of Time Emiliano Boccardi,L. Nathan Oaklander,Erwin Tegtmeier,2024-12-26 The main debates in the philosophy of time have centred on whether A theory with events ordered by pastness presentness and futurity or B theory ordered by earlier than or later than are equally fundamental Emiliano Boccardi L Nathan Oaklander and Erwin Tegtmeier instead uphold the Russellian theory or R theory and consider not only the fundamental differences but also its superiority They argue McTaggart s misinterpretation of Russell has led to a false dichotomy between the A and B theories while exploring the connection between temporal relations temporal facts and time In defence of the R theory they argue how it offers a metaphysical explanation of the nature of time in addition to investigating whether ontological theories of time can be considered from a moral or existential point of view Using an ontological approach this volume clarifies what is mistaken about both theories can only be resolved by adopting a Russellian philosophy reaching beyond the A theory vs B theory debate *Proceedings, American Philosophical Society (vol. 96, no. 3)*
