Literature Edgar V. Roberts,Henry E. Jacobs,2005 For Introduction to Literature courses and Freshman Composition courses that emphasize writing about literature Message Roberts has the best coverage of writing about literature Complete coverage of writing about each element and a total of 23 student essays with accompanying commentary ensure student comprehension of writing about literature and therefore produce better student papers Story When Edgar Roberts taught literature and composition many years ago a large part of his course work involved essay writing assignments He would dedicate a substantial amount of his class time explaining how the students should prepare their writing assignments and he

discovered that the more he described to his students what he wanted and the longer he explained things the better the final essays turned out to be He realized that there was a direct correlation between the way he made his assignments and the quality of student work he received However giving his students such explicit essay writing directions was taking up too much of his classroom time At that point Professor Roberts started to write and hand out directions thus saving him valuable classroom time Over the years he tried and tested each assignment in his own classes In addition to writing coverage Professor Roberts recognized that literature classrooms needed both writing about literature instruction and an anthology to meet the needs of the literature and composition course Literature An Introduction to Reading and Writing Compact Edition is founded on the principles of writing about literature It is not an afterthought and it is not treated as a separate chapter or appendix but rather it is the carefully integrated philosophy of Professor Roberts approach to teaching literature and composition In addition to his own contributions to the book Professor Roberts has also made innumerable changes and improvements based on both student questions and student writing as well as from professor feedback To this day each new edition is revised and perfected based on professor and student needs to meet the changing needs of today s students

A Prentice Hall Guide to Evaluating Online Resources M. Neil Browne, Stuart M. Keeley, 2003 *Connecting People with Technology* George Hayhoe, Helen Grady, 2020-11-25 This book explores five important areas where technology affects society and suggests ways in which human communication can facilitate the use of that technology Usability has become a foundational discipline in technical and professional communication that grows out of our rhetorical roots which emphasize purpose and audience As our appreciation of audience has grown beyond engineers and scientists to lay users of technology our appreciation of the diversity of those audiences in terms of age geography and other factors has similarly expanded We are also coming to grips with what Thomas Friedman calls the flat world a paradigm that influences how we communicate with members of other cultures and speakers of other languages And because most of the flatteners are either technologies themselves or technology driven technical and professional communicators need to leverage these technologies to serve global audiences Similarly we are inundated with information about world crises involving health and safety issues These crises are driven by the effects of terrorism the aging population HIV AIDS and both human made and natural disasters These issues are becoming more visible because they are literally matters of life and death Furthermore they are of special concern to audiences that technical and professional communicators have little experience targeting the shapers of public policy seniors adolescents and those affected by disaster Biotechnology is another area that has provided new roles for technical and professional communicators We are only beginning to understand how to communicate the science accurately without either deceiving or panicking our audience We need to develop a more sophisticated understanding of how communication can shape reactions to biotechnology developments Confronting this complex network of issues we re

challenged to fashion both our message and the audience's perceptions ethically. Finally, today's corporate environment is being shaped by technology and the global nature of business. Technical and professional communicators can play a role in capturing and managing knowledge in using technology effectively in the virtual workplace and in understanding how language shapes organizational culture.
