America, History and Life ,2004 Article abstracts and citations of reviews and dissertations covering the United States and Canada *Frank Crowe* Dov Silverman,2013-05-12 Building the Hoover Dam led the America and the world out of the Great Depression See life through the eyes of farmers hustlers bricklayers businessmen politicians whores and truck drivers who built the Dam then traveled 21 miles on Death s Highway to Sin City Las Vegas where legal gambling whorehouses and cold beer awaited The Hoover Dam began with the death of worker John G Tierney December 20th 1922 and ended with the death of his son Patrick W Tierney December 20th 1935 exactly thirteen years to the day in the same river working on the Hoover Dam From Theodore Roosevelt to Franklin Roosevelt seven American Presidents were personally involved in the building of the Dam Larger than the Pyramids more complex than the Great Wall of China the Hoover Dam helped populate the western United States America became the bread basket of the world This dam controls floods and drought in seven states provides electricity fresh drinking water to irrigate 1 4 million square miles of new farm land The weight of the water behind the dam moved planet earth a fraction out of balance

Epic Achievements Against Incredible Odds Steve McCurdy,2015-06-18 This is the fascinating the story of how a few great Americans between 1930 and 1952 overcame incredible challenges to build some of the world s most remarkable architectural wonders Drawing upon his impressive knowledge of American history the author chronicles the country s emergence in the Roaring Twenties as the world s pre eminent builder of great dams bridges and skyscrapers He skillfully combines little known back stories with vintage photographs to show how America s architects engineers and contractors working with arcane technologies and slide rules used innovation ingenuity and inspiration to build some of the world s most extraordinary structures faster and better than they have been built before or since Mr McCurdy s narrative includes Hoover Dam In the depths of the Great Depression a man from Maine named Frank Crowe assembled a rag tag army of 5 000 unemployed men in the middle of the Mojave Desert Working in conditions that were sometimes brutal without the benefit of modern technologies Crowe and his men not only built the world s greatest dam but they finished it under budget two years ahead of schedule The Golden Gate Bridge In his account of the building of this celebrated bridge McCurdy tells the little known back story of Charles Ellis Fired by a boss jealous of his engineering genius Ellis worked tirelessly behind the scenes without pay or acknowledgement to write the bid specifications for every single component of the bridge Although he is now regarded as

the father of the bridge Ellis received no recognition during his lifetime The Empire State Building Paul Starrett was an organizational genius and is often referred to as the father of the American skyscraper McCurdy tells the remarkable story of how in 1931 Starrett built the Empire State Building from ribbon cutting to completion in the astonishing time of 391 days a record which has never been challenged and which amazes structural engineers to this day The Pentagon Prior to the Japanese attack on Pearl Harbor in 1941 40 000 War Department personnel in Washington DC were spread out among 22 separate buildings One man was given the task of bringing them all together under one roof Less than eight months after he broke ground Brehon Burke Somervell was moving employees into the world s largest building the 6 6 million square foot Pentagon The SS United States When he was eight years old William Francis Gibbs began dreaming of building the world s greatest ocean liner Fifty eight years later on May 14 1952 Gibbs guided his thousand foot long dream ship into open waters With the greatest power to weight ratio ever achieved in any passenger vessel the SS United States broke the transatlantic crossing speed record by 10 hours on her maiden voyage In the second half of Epic Achievements Against Incredible Odds the author carefully traces the country s post war decline as the world s great builder and identifies and analyzes the causes of its slide McCurdy ends his book with a frank and compelling assessment of how when and whether the United States will ever bounce back and re establish its supremacy as the world s master builder of architectural icons Order this book now to enjoy the unforgettable stories of the men behind some of history s most enduring engineering accomplishments

Colossus Michael Hiltzik, 2010-06-01 As breathtaking today as the day it was completed Hoover Dam not only shaped the American West but helped launch the American century In the depths of the Great Depression it became a symbol of American resilience and ingenuity in the face of crisis putting thousands of men to work in a remote desert canyon and bringing unruly nature to heel Pulitzer Prize winning writer Michael Hiltzik uses the saga of the dam s conception design and construction to tell the broader story of America s efforts to come to grips with titanic social economic and natural forces For embodied in the dam s striking machine age form is the fundamental transformation the Depression wrought in the nation s very culture the shift from the concept of rugged individualism rooted in the frontier days of the nineteenth century to the principle of shared enterprise and communal support that would build the America we know today In the process the unprecedented effort to corral the raging Colorado River evolved from a regional construction project launched by a Republican president into the New Deal s outstanding and enduring symbol of national pride Yet the story of Hoover Dam has a darker side Its construction was a gargantuan engineering feat achieved at great human cost its progress marred by the abuse of a desperate labor force The water and power it made available spurred the development of such great western metropolises as Los Angeles Phoenix Denver Las Vegas Salt Lake City and San Diego but the vision of unlimited growth held dear by its designers and builders is fast turning into a mirage In Hiltzik s hands the players in this epic historical tale spring vividly to life President Theodore Roosevelt who conceived the project William Mulholland Southern California s great builder

of water works who urged the dam upon a reluctant Congress Herbert Hoover who gave the dam his name though he initially opposed its construction Frank Crowe the dam's renowned master builder who pushed his men mercilessly to raise the beautiful concrete rampart in an inhospitable desert gorge Finally there is Franklin Roosevelt who presided over the ultimate completion of the project and claimed the credit for it Hiltzik combines exhaustive research trenchant observation and unforgettable storytelling to shed new light on a major turning point of twentieth century history Hoover Dam Joseph E. Stevens, 2014-09-12 In the spring of 1931 in a rugged desert canyon on the Arizona Nevada border an army of workmen began one of the most difficult and daring building projects ever undertaken the construction of Hoover Dam Through the worst years of the Great Depression as many as five thousand laborers toiled twenty four hours a day seven days a week to erect the huge structure that would harness the Colorado River and transform the American West Construction of the giant dam was a triumph of human ingenuity yet the full story of this monumental endeavor has never been told Now in an engrossing fast paced narrative Joseph E Stevens recounts the gripping saga of Hoover Dam Drawing on a wealth of material including manuscript collections government documents contemporary newspaper and magazine accounts and personal interviews and correspondence with men and women who were involved with the construction he brings the Hoover Dam adventure to life Described here in dramatic detail are the deadly hazards the work crews faced as they hacked and blasted the dam's foundation out of solid rock the bitter political battles and violent labor unrest that threatened to shut the job down the deprivation and grinding hardship endured by the workers families the dam builders gambling drinking and whoring sprees in nearby Las Vegas and the stirring triumphs and searing moments of terror as the massive concrete wedge rose inexorably from the canyon floor Here too is an unforgettable cast of characters Henry Kaiser Warren Bechtel and Harry Morrison the ambitious headstrong construction executives who gambled fortune and fame on the Hoover Dam contract Frank Crowe the brilliant obsessed field engineer who relentlessly drove the work force to finish the dam two and a half years ahead of schedule Sims Ely the irascible teetotaling eccentric who ruled Boulder City the straightlaced company town created for the dam workers by the federal government and many more men and women whose courage and sacrifice greed and frailty made the dam's construction a great human as well as technological adventure Hoover Dam is a compelling irresistible account of an extraordinary American epic **The Builder of the Dam** William Heyliger, 1929 **Bob Hazard, Dam Builder** Carl Brandt, 2021-11-05 In *Bob Hazard Dam Builder* by Carl Brandt readers are taken on an exploration of the life of Bob Hazard a visionary engineer dedicated to the monumental task of constructing dams Through detailed descriptions and technical explanations Brandt immerses the reader in Hazard's world showcasing the challenges and triumphs of his groundbreaking work The narrative is rich in historical context shedding light on the importance of dam construction in the early 20th century and its impact on society Brandt's writing style is informative yet engaging making this book accessible to both scholars and enthusiasts of engineering history The lyrical prose and vivid imagery bring Hazard's

story to life captivating readers from beginning to end Carl Brandt drawing on his own background in engineering brings a unique perspective to *Bob Hazard Dam Builder* His passion for the subject shines through in the meticulous research and attention to detail evident in the book With a blend of historical accuracy and storytelling finesse Brandt expertly crafts a compelling narrative that sheds light on an often overlooked aspect of American history *Bob Hazard Dam Builder* is a must read for anyone interested in engineering feats and the untold stories of the past

Big Dams and Other Dreams Donald E. Wolf, 1996 Explores the businesses and personalities responsible for the construction of the Hoover Bonneville and Grand Coulee dams

Building Hoover Dam Andrew J. Dunar, Dennis McBride, 1993 Built between 1931 and 1936 Hoover Dam stands as a magnificent tribute to the indomitable will spirit and resourcefulness of the American people during the years of the Great Depression The dramatic story of this great public works endeavor which put thousands of Americans back to work and resulted in one of the largest dams in the world embodies hope danger politics adventure struggle humor determination and inspiration And while other books have chronicled the dam s construction until now none has done so in the words of the workers themselves *Building Hoover Dam* represents oral history at its finest Drawing on priceless archival material as well as interviews conducted expressly for this volume editors Andrew J Dunar and Dennis McBride present a stirring eyewitness account of the dam workers experience The chapters framed by instructive introductory and concluding sections document the workers stories in a chronological and thematic fashion in their own words the men women and children who participated in this monumental undertaking speak of everything from setting up tent homes along the Colorado River to hauling 30 foot pipes over primitive roads with hairpin turns from establishing schools and churches on a government reservation to attending the 1935 dedication ceremony at which Franklin Roosevelt spoke Their stories are by turn humorous and tragic gripping and triumphant touching and courageous Skillfully interweaving background information to clarify and set the testimony in context the editors make complex sometimes technical material readily understandable to readers they also address forthrightly such issues as racial discrimination women s roles the Boulder vs Hoover Dam naming controversy and Boulder City residents divisiveness over remaining part of the government or incorporating as an independent town Augmenting the volume are over 60 illustrations and a trio of appendixes that detail workers terminology FDR s dedication address and the individuals who lost their lives during the dam s construction A fascinating moving account of a major achievement in our nation s history *Building Hoover Dam* holds significant appeal for citizens today pulling together with a sense of national renewal
