American Architects And Texts:

American Architects and Texts Juan Pablo Bonta,1996 In this volume the author analyzes 400 architectural books and articles published over the past 150 years to reveal changing societal preferences in architecture and to measure the reputations of individual architects the text includes a ranked list of the 100 most famous architects **American Architect**,1908 American Architects and Their Books, 1840-1915 James F. O'Gorman,Kenneth Hafertepe,2007 American Architects from the Civil War to the First World War Lawrence Wodehouse,1976 *American Architects* Les Krantz,1989 A detailed survey of the leading exponents of contemporary American architecture this reference guide examines the lives and work of more than 1000 architects The text has been organized alphabetically and each entry lists biographical details and architectural achievements The American Architect ,1919 *American Architects and Architectural Histories* Juan Pablo Bonta,1982 Great American Architects Series ,1895 *A Concise History of American Architecture* Leland M. Roth,1980 **The American Architect** ,1931 Walker & Gillette Edith Crouch,2014 The work of Walker Gillette one of the leading architectural firms of the twentieth century is documented with an extensive text and over 800 illustrations These include many unpublished works by the company and by architect Joseph Mordecai Hirschman whose passion for old world buildings influenced their design The first half of the twentieth century featured a wide variety of architectural styles including Classicism Art Deco and Modernism which Walker Gillette used well Established in the early twentieth century this firm would remain active until the 1950s Over the years the firm diversified planning residential country estates urban mansions town homes and apartments Commercial corporate and governmental architecture Art Deco skyscrapers and unique commissions are all covered as are the interiors they created for private yachts ocean liners the Playland Amusement Park and their 1939 New York World s Fair offering This book has relevance and appeal to architects artists historians and readers who love vibrant American history **American Architecture** David P. Handlin,1985 Traces the history of U S architecture looks at public buildings offices and homes and discusses influential movements and architects Three Centuries of Notable American Architects Joseph Jacobs Thorndike,1981 Profusely illustrated text describes the personalities and architectural achievements of major American architects of the past and present **American Architects and the Mechanics of Fame** Roxanne Kuter Williamson,2014-03-07 Why does one talented individual win lasting recognition in a particular field while another equally talented person does not While there are many possible reasons one obvious answer is that something more than talent is requisite to produce fame The something more in the field of architecture asserts Roxanne Williamson is the association with a famous architect at the moment he or she first receives major publicity or designs the building for which he or she will eventually be celebrated In this study of more than six hundred American architects who have achieved a place in architectural histories Williamson finds that only a small minority do not fit the right person right time pattern She traces the apprenticeship connection in case studies of Louis Sullivan Frank Lloyd Wright Henry Hobson

Richardson the firm of McKim Mead White Latrobe and his descendants the Bulfinch and Renwick Lines the European immigrant masters and Louis Kahn Although she acknowledges and discusses the importance of family connections the right schools self promotion scholarships design competition awards and promotion by important journals Williamson maintains that the apprenticeship connection is the single most important predictor of architectural fame She offers the intriguing hypothesis that what is transferred in the relationship is not a particular style or approach but rather the courage and self confidence to be true to one s own vision Perhaps she says this is the case in all the arts American Architects and the Mechanics of Fame is sure to provoke thought and comment in architecture and other creative fields *American Architects and Their Books to 1848* Kenneth Hafertepe, James F. O'Gorman, 2001 The essays in this volume range from studies of architectural publications available in the colonies to the appearance of American architectural incunabula to the revolution in architectural publishing that occurred in the 1830s and 1840s BOOK JACKET **American Architect** ,1907 **American Architect** ,1933 **Shaping a Nation** Carter Wiseman, 1998 The critic and historian presents an account of the most influential figures movements and buildings that have defined twentieth century American architecture **The American Architect** ,1925 The American Architect and Building News ,1883
