The Denuclearisation of the Oceans R. B. Byers, 2022-12-15 In the 1980s concern throughout the world was growing about the use of the oceans by nuclear powered naval vessels and naval vessels carrying nuclear weapons Many countries were keen to keep their ports and the waters off their coastlines nuclear free Originally published in 1986 this book presents a worldwide survey of the state of the nuclear use of the oceans and assesses the prospects for denuclearisation at the time It looks at the legal background the practical issues and the attitudes and positions in different parts of the world while regional efforts of disarmament and arms control are necessary so are global efforts At the same time international legal norms including the Law of the Sea must be adopted and utilized in the ever difficult search for world peace Arvid Pardo

**Energy Abstracts for Policy Analysis** ,1987-07      **Superpowers at Sea** Richard W. Fieldhouse, Shunji Taoka, 1989 The arms race at sea is a dangerous nuclear race which is causing growing international concern and must be brought under control What are the hard facts about the situation This book documents the realities of the competition especially the nuclearization of naval forces and dispels some of the myths surrounding the naval arms race This incisive analysis of naval forces of the East and West concludes that contrary to common perceptions the US and its allies have a considerable military advantage over the Soviet Navy a trend which is expected to continue for the foreseeable future The authors describe in detail the widespread nuclearization of naval forces of all five nuclear navies analyse the implications for security and arms control and conclude with suggestions for possible arms control measures      *Arms Control At Sea* J Richard Hill, 2024-04-01 Originally published in 1989 this book reviews the history of maritime control measures from before the First World War and provides a critical examination of both the objectives of maritime power and the concepts of disarmament peace zones parity verifiability and peaceful co existence It argues that the objectives of maritime power are not necessarily incompatible with international security and that strategic deterrence can contribute to improved security Limitation measures it is argued can in some cases be double edged endangering other security fields and having a destabilizing effect The book stresses the need for non absolute solutions in order to achieve a reasonable level of security and makes proposals for both structural and confidence building measures along those lines      **Ocean Governance and the United Nations** Elisabeth Mann
