Making It in America Elliott Robert Barkan, 2001-05-01 This collection of over 400 biographies of eminent ethnic Americans celebrates a wide array of inspiring individuals and their contributions to U S history The stories of these 400 eminent ethnic Americans are a testimony to the enduring power of the American dream These men and women from 90 different ethnic groups certainly faced unequal access to opportunities Yet they all became renowned artists writers political and religious leaders scientists and athletes Kahlil Gibran Daniel Inouye Zbigniew Brzezinski Thurgood Marshall Madeleine Albright and many others are living proof that the land of opportunity sometimes lives up to its name Alongside these success stories as historian Elliot R Barkan notes in his introduction to this volume there have been many failures and many immigrants who did not stay in the United States Nevertheless the stories of these trailblazers visionaries and champions portray the breadth of possibilities from organizing a nascent community to winning the Nobel prize They also provide irrefutable evidence that no single generation and no single cultural heritage can claim credit for what America is

Spirits of Empire Tisa Wenger, 2026-03-17 The Declaration of Independence depicted Native Americans as bloodthirsty savages and from its founding the United States aimed to expand westward by seizing Indigenous lands While white settlers saw these conquests as victories for true religion native people invoked the spirits in their own defense Some claimed the powers of Christianity while others drew on the English language concept of religion to redefine their own ancestral traditions As all sorts of people struggled to make their way within this new empire a broad variety of new religious movements emerged In this groundbreaking book historian Tisa Wenger shows how the history of American religion unfolded on these settler colonial foundations The imperatives of US empire she argues shaped the category and traditions of what we know as religion Wenger also introduces the concept of settler secularism to explain how white settlers defined and managed religion in their own image in order to facilitate their own rule She shows how the concept of religion whether as a special thing that requires protection or a mark of the primitive that must be transcended has most often served the interests of those in power Ultimately settler colonialism organized American religion and created religious hierarchies that still influence the United States today
