The guide is intended both for people who must limit their sodium salt intake and those who want to choose foods. Foods are listed alphabetically by brand name or by the name of the food. The singular form is used and listed individually. While sodium is an essential nutrient, people may be consuming greater amounts than is healthy for them. Some foods high in sodium don't taste salty or are not perceived as salty. The processed food industry is working with the FDA on a voluntary basis to lower sodium content of food. Information on portions, used sources of data, food groups, abbreviations, and symbols and equivalents are discussed. kbc **The Barbara Kraus 1985 Sodium Guide to Brand Names and Basic Foods** Barbara Kraus, 1985-01-02 *Calories and Carbohydrates* Barbara Kraus, 1983 Contains the most accurate and dependable caloric and carbohydrate counts for practically everything you will eat and drink. **Books in Print**, 1994 **A Research Guide to the Health Sciences** Kathleen J. The coverage of each of the many controversial food issues in the set offers perspectives from different sides to encourage readers to examine various viewpoints and make up their own
