The Metropolitan Frontier and American Politics Daniel J. Elazar, 1970 American civilization has been shaped by four decisive forces the frontier migration sectionalism and federalism The frontier has offered abundance to those who would could take advantage of its opportunities stimulated technological innovation and been the source of continuous change in social structure and economic organization migration has been responsible for relocating cultures from the Old world to the New various sections of geographic territories have adjusted to the overall American culture without losing their individual distinctiveness and federalism has shaped the United States political and social organization *The Metropolitan Frontier and American Politics* was begun in the late 1950s under the auspices of the University of Illinois Institute of Government and Public Affairs as a study of the eight lesser metropolitan areas in Illinois What started out as a design for community maps of each area with the intent to outline their particular political systems led to a major study of metropolitan cities of the prairie the heartland area between the Great Lakes and the Continental Divide with an examination of the processes that have shaped American politics The distinctive features of geographic areas that Elazar discovered can be understood as reflections of the differences in cultural backgrounds of their respective settlers Understanding these communities requires an examination of their place in the federal system the impact of frontier and section upon them and a study of the cultures that inform them as civil communities The volume is consequently divided into three parts *Cities Frontiers and Sections Streams of Migration and Political Culture and Cities States and Nation* each of which explores Elazar's concerns in discovering the interrelationship between the cities of the frontier and American politics A prequel to *The Closing of the Metropolitan Frontier* published by Transaction in 2002 *The Metropolitan Frontier and American Politics* will be of great interest to students of politics American history and ethnography

The Opening of the Cybernetic Frontier Daniel Elazar, 2018-04-17 *The Opening of the Cybernetic Frontier* is the third in J stallment in the *Cities of the Prairie* project It completes an ongoing multi generational comparative study of ten medium sized communities located in five Prairie and Plains states Illinois Iowa Minnesota Wisconsin and Colorado This long term study was initiated by Daniel J Elazar in 1959 to develop a comprehensive theory explaining and forecasting the development of the civil community based upon the changing relationship between internal developments and external factors In this new volume Elazar and his colleagues trace developments in these communities during the 1980s and 1990s The study examines how local communities function politically socially and economically and then analyzes the impact that regional national and international trends and patterns have on local political systems in general and the cities of the prairie in particular It revisits these communities at

the dawning of a new frontier the city cybernetic frontier which is characterized by a knowledge intensive economic base made possible by computer and communication technologies Changing technology has accelerated the settlement patterns that emerged after World War II Ongoing population sprawl means that individuals are leaving the suburbs to live in the exurbs and beyond creating a citybelt phenomenon that relies upon new technologies [Building Cities in America](#) Daniel Judah Elazar,1987 What is the distinctive character of America s cities How have our metropolitan regions evolved since the Colonial period What effect will local politics have on the future of the American city These are the questions Daniel J Elazar addresses in this third volume of his highly acclaimed Cities of the Prairie trilogy Recognizing the growing alienation from local institutions on the part of city dwellers nation wide Elazar explains why the restoration of local attachments should be a matter of first priority Co published with Jerusalem Center for Public Affairs **The Metropolitan Frontier and American Politics** Daniel Elazar,2020-03-10 American civilization has been shaped by four decisive forces the frontier migration sectionalism and federalism The frontier has offered abundance to those who would could take advantage of its opportunities stimulated technological innovation and been the source of continuous change in social structure and economic organization migration has been responsible for relocating cultures from the Old world to the New various sections of geographic territories have adjusted to the overall American culture without losing their individual distinctiveness and federalism has shaped the United States political and social organization The Metropolitan Frontier and American Politics was begun in the late 1950s under the auspices of the University of Illinois Institute of Government and Public Affairs as a study of the eight lesser metropolitan areas in Illinois What started out as a design for community maps of each area with the intent to outline their particular political systems led to a major study of metropolitan cities of the prairie the heartland area between the Great Lakes and the Continental Divide with an examination of the processes that have shaped American politics The distinctive features of the geographic areas that Elazar discovered can best be understood as reflections of the differences in cultural backgrounds of their respective settlers Proper understanding of these communities therefore requires an examination of their place in the federal system the impact of frontier and section upon them and a study of the cultures that inform them as civil communities The volume is consequently divided into three parts Cities Frontiers and Sections Streams of Migration and Political Culture and Cities States and Nation each of which explores Elazar s concerns in discovering the interrelationship between the cities of the frontier and American politics A prequel to The Closing of the Metropolitan Frontier The Metropolitan Frontier and American Politics will be of great interest to students of politics American history and ethnography **Beaubien V. Steiner,1997 What does it mean to live in the West today Do people tend to identify with states with regions or with the larger West This book examines the development of regional identity in the American West demonstrating that it is a regionally diverse entity

made up of many different wests Great Plains Southwest Rocky Mountains and more in which American regionalism finds its fullest expression These fourteen original essays tell how a sense of place emerged among residents of various regions and how a sense of those places was developed by people outside of them Wrobel and Steiner first offer a compelling overview of the West s regional nature then thirteen other rising or renowned scholars from history American Studies geography and literature tell how regional consciousness formed among inhabitants of particular regions All of the essays address the larger issue of the centrality of place in determining social and cultural forms and individual and collective identities Some focus on race and culture as the primary influences on regional consciousness while others emphasize environmental and economic factors or the influence of literature Some even examine western regionalism in areas that lie beyond the West as it has traditionally been conceived Each of the contributors believes that where a people live helps determine what they are and they write not only about the many wests within the larger West but also about the constant state of flux in which regionalism exists Many books speak of the West as a place but few others deal with the West s different places Many Wests presents a vision of the West that reflects both the common heritage and unique character of each major subregion building on the revisionist impulse of the last decade to help redirect New Western History toward an appreciation of regional diversity and integrate scholarship in the regional subfields It is a book for everyone who lives in studies or loves the West for it confirms that it is home to very different peoples economies histories and regions **Cole-Randazzo V.
