## Clustering Phenomena In Atoms And Nuclei:

*Clustering Phenomena in Atoms and Nuclei* Marten Brenner, Tom Lönnroth, F. Bary Malik, 2013-06-29 In these days of specialization it is important to bring together physicists working in diverse areas to exchange and share their ideas and excitement This leads to cross fertilization of ideas and it enriches as in biological systems a specialized field with new strength development and direction derived from another area Although this might be an uncommon thing it is an important step in our understanding of the physical world around us which is after all the main purpose of physics The seed for this conference was really sowed when one of us MB and Mr Manng rd showed some a scattering data at backward angles to FBM one summer about four years ago That occasion led to a long research collaboration between the Abo Akademi physicists and other scientists in several countries The actual idea to explore the possibility of holding a conference however crystallized in the summer of 1989 during a visit of FBM to Abo Akademi The final decision to organize a conference was made after MB visited Profes sor Ben Mottelson in Copenhagen and Professor Anagnostatos in Athens At this point it was recognized that there are similarities as well as differences between clustering phenomena in nuclei and systems consisting of atoms It was therefore conjectured that it could be very stimulating to bring together these groups to exchange their ideas and to learn from each other s fields A conference along these lines we hoped would contribute to an increased mutual understanding
